**Vedic Mathematics,**  
(Sunlight format Mathematics)  
**Concepts of Transcendence**  
**Mathematics of Creator's space**

1

Introductory

1. The concept of transcendence mathematics of creator's space are focused upon the concept of 'dimension of dimension'.
2. Aim is to be face to face with the phenomena of transcendence from dimension to dimension of dimension level.
3. This chase is being followed here in creator's space (4-space) which is of a spatial dimensional order and is also of transcendental origin.
4. That way, the prime focus, here is going to be upon a pair of features of creator's space (4-space), firstly as that, it is of a spatial order (2-space plays the roll of dimension), and secondly as that it is of transcendental origin (5-space in the roll of origin of 4-space).
5. As the working domain is of creator's space, which is of a spatial dimensional order, as such 4-space content manifesting as domain fold, shall be permitting approach in terms of a dimensional frame of a pair of dimension.
6. It is this feature of simultaneous availability of a pair of dimension, that way shall be making the whole approach being of a pair of steps, of which the first step would be along the first dimension (Axis). And second step to be along the second Axis.
7. This as such shall be leading to a mathematics of '2 as 1 and 1 as 2' being available simultaneously.
8. This mathematics of 2 as 1 and 1 as 2 being available simultaneously is the mathematics of 4-space (creator's space).
9. This is also designated as spatial mathematics.
10. Spatial mathematics is the basis of Vedic mathematics science and technology.
11. The phenomena of transcendence at origin of 4-space, that way fix Vedic mathematics science and technology as transcendence mathematics science and technology.

12. As such, during this chase we are entering the domain of transcendence mathematics science and technology.
13. This naturally requires mind to be fulfilled with intensity of urge to know more and more and to be face to face with the phenomena of transcending mind.
14. There is going to be a blissful experience to permit the transcending mind to be face to face with it self and to go parallel to the self referral state of transcending mind.
15. It of its own shall be leading to unity state consciousness at the base of perfection of knowledge within one's consciousness field.
