Bindu Sarovar

बिन्दु सरोवर

1. 'बिन्दु सरोवर' / 'Bindu Sarovar' is a basic conceptual term of Vedic Systems.
2. Simple English rendering of 'बिन्दु सरोवर' / 'Bindu Sarovar' is point reservoir.
3. It is a 'reservoir' of structures embedded and sustained within '.' / (point)
4. Vedic Systems chase our solar universe.
5. This chase is as a range of 26 chand (छन्द) / meters.
6. This whole range is embedded and is sustained within '.' / (point), as a 'सरोवर' / 'Sarovar' / reservoir.
7. One may have a pause here and take note that TCV (बिन्दु)= 26.
8. One may further have a pause here and take note that TCV (सरोवर) = 26.
9. Still further, one shall have a pause and take note that TCV (बिन्दु सरोवर) = 26 + 26 = 52.

10. Still further, it would be relevant to note that NVF (Earth) = 52 = TCV (बिन्दु सरोवर)
11. One may further have a pause here and take note that taking 'Earth', as 'बिन्दु सरोवर' / 'Bindu Sarovar' / point reservoir, the chase of Earth in motion as revolving around its own axis, as well as around the Sun, will bring us face to face with the features of the systems at work in this Phenomenon.
12. One may further have a pause here and take note that dimensional synthesis value of pair (26, 26) = 28= TCV (ब्रह्म्)
13. Still further It also would be relevant to note that dimensional synthesis value for the pair (-26, -26) = (-24) = TCV (पुरूष)
14. Still further It also would be relevant to note that absolute value of (-24) = 24 = TCV (पुरूष)
15. Still further It also would be relevant to note that 26 + 26 = 28 + 24
16. Still further It also would be relevant to note that five steps long range (28, 27, 26, 25, 24) is a transcendental range coordinating Braham (ब्रह्म्) and Pursha (पुरूष)
17. It is this coordination of Braham and Pursha, which, that way, deserve to be chased.
18. This of the format and features of transcendental chase.
19. It is this transcendental chase which shall be parallel to a pair of manifested layers path of folds (52, 53, 54, 55) and (52, 53, 54, 55)
20. Here it would be relevant to note that NVF (Sky) = 55 and NVF (Sunlight) = 110 = 55 + 55.
21. Still further It also would be relevant to note that NVF (four space) = 104 = 52 + 52 = NVF (Earth, Earth)
22. Still further it also would be relevant to note that NVF (Infinity) = 106 = 53 + 53 = NVF (Axis, axis) = NVF (Pole star)
23. NVF (Geometry) = 108 = 54 + 54 = NVF (Sun, Sun)
24. One shall sit comfortably and permit the transcending mind to continuously remain in prolonged sitting of trans and to be face to face with above features and to glimpse the Phenomenon and to imbibe the values thereof and to acquire deep insight about these virtues and to have a vision of enlightenment.

13-04-2015 Dr. Sant Kumar Kapoor
