Values essence chase steps sum up

I

Existence Phenomenon

Existence Phenomenon

1. Values essence chase of Existence Phenomenon is to be as 'within frames', as well as 'without frames'.
2. Values chase of Existence Phenomenon within Frames is to be of the format of 'Framed Domains'
3. 'Framed domains' are the space content lumps manifesting as Domain Folds of the 'manifestation layers'.
4. Manifestation layers are of four folds namely dimension fold, boundary fold, domain fold and origin fold.
5. Framed domain is the domain fold enveloped within boundary fold.
6. Further the framed domain accepts dimensional frame, as internal frame, as comparison to boundary fold being the external frame of the framed domain.
7. Still further, with imposition of the origin of the dimensional frame upon the seat of origin fold, the origin / center of the domain (fold) gets sealed.
8. With it Framed Domain becomes the Sealed Framed Domain.
9. One may have a pause here and take note that origin fold is of a higher dimensional order than that of the Domain Fold itself.
10. Still further it also would be relevant to note that, the Base of origin fold, which itself is a dimensional fold of a degree higher than that of origin fold itself, as such the higher dimensional order of the base fold transcends through the origin fold and the same gets superimposed upon the dimensional order of domain fold itself.
11. One shall sit comfortably and permit the transcending mind to continuously remain in prolonged sitting of deep trans and to glimpse the format and features of above transcendence Phenomenon.
12. The superimposition of the dimensional order of base fold upon the dimensional order of Domain Fold brings us face to face with the features of Sealed Framed Domain with permissibility of

- transcendence for the higher dimensional order into the domain fold, transforming the sealed framed domain itself into of transcendental format and features
13. It is this Phenomenon of transition and transformation of sealed framed domain into of the format and features of transcendental values parallel to the dimensional order of base fold which brings us face to face with format and values of the Existence Phenomenon which is beyond framed domain and being lively at the base fold and transcending into the framed domain itself. And this deserve to be fully imbibed to have appreciation of the Existence Phenomenon without Frames as being visualized within Frames.
- II
- Translation of manifestation layers
14. Four fold manifestation layers acquire a format for its translation along the five fold transcendence range. One may have a pause here and take note that the five fold transcendence range gives a rise to a pair of four fold manifestation layers, first of which being the set up of first four folds while second manifestation layers being the set up of second to fifth fold of the five fold transcendence range.
15. One may have a pause here and take note that the transition and transformation into the first manifestation layer into second manifestation layer along transcendence range is the Phenomenon of the format and features of translation of the manifestation layer itself.
16. One may further have a pause here and take note that this transition and transformation format of the manifestation layer into next consecutive manifestation layers is of translation for each of the fold of the manifestation layers to take one step a time
17. One may a pause here and take note that the first fold manifestation layer namely the dimension fold, with transition step, as result into the boundary fold,
18. The first manifestation layer transiting into the role of dimension fold for the next manifestation layer.
19. Likewise the second fold of the first manifestation layer, namely its boundary with a translation step shall transforming third fold in the domain fold of the first manifestation layer into the role or boundary fold of the second manifestation layers.
20. Further the origin fold of first manifestation layer shall be transiting into role of dimension domain fold the second fold
21. Finally the base fold of first manifestation layer, put step into the origin fold of the second manifestation layers.
22. One may have a pause here and take note that the translation Phenomenon putting base fold of the first manifestation layers into the role of the origin fold the manifestation layers
23. One may have a pause here and take note that push for the base fold to go into the fold of origin fold is from the format fold of the base fold
24. One may have a pause here and take note that the in a sequence origin fold is the fourth fold, base fold is the fifth fold
25. And format fold is the sixth fold
- Format fold**
26. Format fold is the sixth fold
27. Format fold is at the base of base fold. Base fold is the fifth fold and format fold is the sixth fold. Origin fold is the fourth

fold, base fold is the fifth fold and format fold is the sixth fold.

28. Dimensional fold, boundary fold, domain fold, origin fold, Base fold and format fold constitute a range of six fold set up, designated and known as self referral (6-space) range of six folds
29. First five folds of self referral (6-space) range constitute first transcendence
30. Second to sixth folds of self referral (6-space) range fold constitute the second transcendence range.
31. This way, the self referral (6-space) range constitute a format for translation the transcendence range.
32. It would be a blissful exercise to glimpse and to imbibed values of the self referral (6-space) range as a path for transcendence
33. One may have a pause here and take note that the six fold of self referral (6-space) range lead to a set up three consecutive fold fold manifestation layers, namely, first manifestation layer being constituted by first four folds, the second manifestation layers being constituted by second to fifth fold, while the third manifestation layer being constituted by third to sixth fold of self referral (6-space) range
34. One may have a pause here and take note that the self referral (6-space) range as such permits translation for first manifestation layer up till third manifestation layers

Reach from first manifestation layer to third layers

35. Fie fold transcendence permits translation for first manifestation layer of first four folds into second manifestation layer of second to fifth fold.
36. Six fold self referral (6-space) permits further translation uptill third manifestation layer of third to sixth folds of the self referral (6-space) range
37. One may have a pause here and take note that the six folds self referral (6-space) range leads to a set up of a pair of five fold transcendence ranges as of format values parallel to (1, 2, 3, 4, 5, 6) leading to (1, 2, 3, 4, 5) and (2, 3, 4, 5, 6).
38. One may further have a pause here and take note that the first and third manifestation layers are of format and values (1, 2, 3, 4) and (3, 4, 5, 6).
39. As such the first manifestation layer (1, 2, 3, 4) shall be availing first four folds of the transcendence (1, 2, 3, 4, 5).
40. The third manifestation layers (3, 4, 5, 6) shall be availing last four fold of the transcendence range (2, 3, 4, 5, 6)
41. One may further have a pause here and take note that the second manifestation layer (2, 3, 4, 5) with its reverse orientation (5, 4, 3, 2) as such shall be availing last fold of the transcendence range and first fold of the transcendence range (2, 3, 4, 5, 6) while the pair of folds (4, 3) shall be playing the role of a 'bridge' for jump over from the first manifestation layer to the third manifestation layer
42. One may further have a pause here and take note that the format fold (sixth fold) provides a push for the base fold for its transition into the role of the origin fold.
43. One may have a pause here and take note that the 4-space plays the role of dimension of 6-space.
44. 3-Space plays the role of dimension of 5-space.
45. Still further it also would be relevant to note that 4-space is a spatial order space (2-space) plays the role of dimension of 4-space and artifice 4 is unique, as much as that $4 = 2 + 2 = 2 \times 2 = (-2) \times (-2)$ and further as that $2^4 = 4^2$

46. One shall have a pause here and permit the transcending mind to continuously remain in prolonged sitting of trans and to glimpse this Phenomenon of translation along self referral (6-space) format resulting into a reach for first manifestation layer (1, 2, 3, 4) into third manifestation layer (3, 4, 5, 6).
47. One may further have a pause here and take note that the inter relationship of first and third manifestation layers (1, 2, 3, 4) and (2, 3, 4, 5, 6) as such, fold wise is the relationship of the format of (dimension fold, domain fold, viz.) (1, 3), (2, 4), (3, 5), (4, 6) which is parallel to (1-space, 3-space), (2-space, 4-Space), (3-Space, 5-space), (5-space, 6-space)

21-08-2015 Dr. Sant Kumar Kapoor
