
Phase 8

VALUES (Axioms & Postulates) OF VEDIC GANITA SUTRAS

Phase 8.1 First letter of the text

*Dr. Sant Kumar Kapoor,
Ved Ratan*

Abstract

Vedic Ganita Sutras (and Upsutras) manifest a self-referral (6-space) domain, the domain which because of its inherent features, sustains itself by unfolding from within.

Axioms and Postulates of Ganita Sutras are of values and features parallel with simultaneous inward and outward, sequential manifestations (of 6-space), as dimension into 8-space domain and 8-space domain of outward progression) into 10-space, 12-space and so on. And as inward manifestation progression from 6-space domain to 4-space dimension and of sequential steps as 2-space, 0-space, -2 space and so on.

First letter of text is the sixth vowel and is of placement value and Sathapatya, within Devnagri alphabet format of number value 6 and of 6-space dimensional frame. The number value 6 is the first perfect number. Surya (Sun) is of 6-space Sathapatya. 6-space is of creative (4-space) dimension. Within 4-space, the space content manifests four fold bodies of full unit, as well as of half unit. Six-space content (D6) manifests within 4-space as full unit Hyper cube 6 (H6) and half unit hyper cube 6 (h6). Frequency of occurrence of 6th vowel in the text of Sutras and Upsutras is '22', which is summation value of four folds (4, 5, 6, 7) of H6. These and other connected features of composition of text of Sutras and Upsutras helps us to appreciate the acceptance of sixth vowel as the first letter.

1. Initiation statement

Vedic scriptures reaching us, being embodiment of Ancient Wisdom / Vedic knowledge system (s), are of a cut off period, as far as the present day knowledge axioms and postulates are concerned.

- i. First feature, emerging very loudly, is that ancient literature has preserved the knowledge, as a unified Discipline of whole range of knowledge as a Grammarised Speaking Language in Devnagri alphabet in Devnagri script. As such the exploration of this domain naturally is to begin with the features and values of Devnagri varanmala (alphabet) and Devnagri lipi (script). And further the reasonable exposure to Grammar rules unfolding meanings of composed formulations of the text are glimpsible.
- ii. The unique features of Vedic mathematics is that it accepts Sathapatya (geometric format) of Sathapatya measuring rod and measuring rope.
- iii. Sathapatya measuring rod is a synthetic set up of four folds manifested bodes of full unit of 1-space to 6-space while the Sathapatya measuring rope is a synthetic set up of four folds bodies of half unit of 1-space to 6-space.
- iv. Manifested bodies of spaces in Creator (4-space) are of four folds manifestation of spaces (s) content (s) within dimensional frame (s), which also accepts synthesis parallel with artifices of numbers.
- v. Parallelism of artifices of numbers and of dimensional axis, bring forth a Sathapatya operation, which is of characteristics features and value of distinct genesis, then that of basic arithmetic and geometric operations. Further, domain split spectra and Transcendence along axes, as well are of characterises features and same are being fully exploited by Vedic Mathematics for being parallel with the follow of transcendental (5-space) content through Surya Rashmi (Rays of Sun).
- vi. Vedic mathematics Sutras' and Upsutras ultimate chase domain is the phenomenon of dimensional order of transcendental (5-space) order of 7-space into 4-space and its manifestation as fifth (base fold) of four fold manifested space bodies of full unit as well as of half unit.

- vii. Ganita Sutras and Upsutras are of axioms and postulates of transcendental 5-space of formation features, because of which Vedic Mathematics of potentialities of its unfolding chase of Existence phenomenon within or without frames.
- viii. Brahma, is the presiding deity of creator (4-space). Formulation Brahma (ब्रह्मा) is of TCV value 29, and is of Vedic Code value 16. The numbers range 1 to 16 is of factors 1 to $29 = 16 + 13$. Both, sixteen Ganita Sutras and 13 Ganita Upsutras are of distinct formats, but simultaneously both Sutras and Upsutras are also of integrated format:

S N	Placement of Sutra/ Upsutra

29	Sutra-16

2. Number value ‘6’

Six is a perfect number: (summation value of triple proper divisors (1, 2, 3 of 6, is $1 + 2 + 3 = 6$). Six is the first perfect number, and is also of characteristics features as that, not only the summation ($1 + 2 + 3$) of triple proper divisors of six is 6 but also the product ($1 \times 2 \times 3$) of them as well is 6 and, the product of all the four divisors (1, 2, 3, 6) of ‘6’, is equal to square of 6.

The right angle tringle of sides (3, 4, 5) frames ‘6’ area unit surface. The quadruple (3, 4, 5, 6) is parallel with four folds Sathapatya of Hyper cube 5 in 4-space. In it, 6-space is origin fold.

3. Frequency of occurrence of 6th vowel in the text

- i. The frequency of occurrence of 6th vowel in the text of Sutras and Upsutras, is ‘Twenty-two’. Text words formulation wise accepting 6th vowel, are as under: -

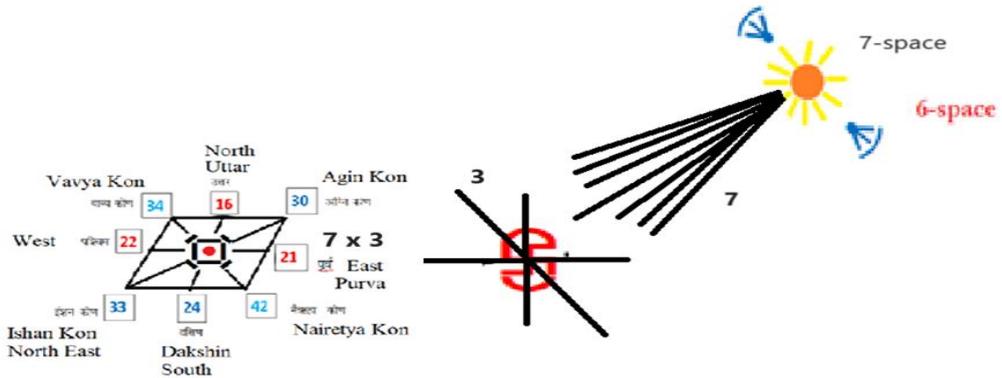

Sutras (frequency of occurrence of 6th vowel is 12)

(S1) एकाधिकेन पूर्वेण ।	(3)	(S4) योजयेत् ।	(1)
(S5) साम्यसमुच्चये ।	(1)	(S6) (आनुरुच्ये)	(1)
(S12) शेषाण्यङ्गकेन चरमेण ।	(3)	(S14) एकन्द्रूनेन पूर्वेण्जं ।	(3)

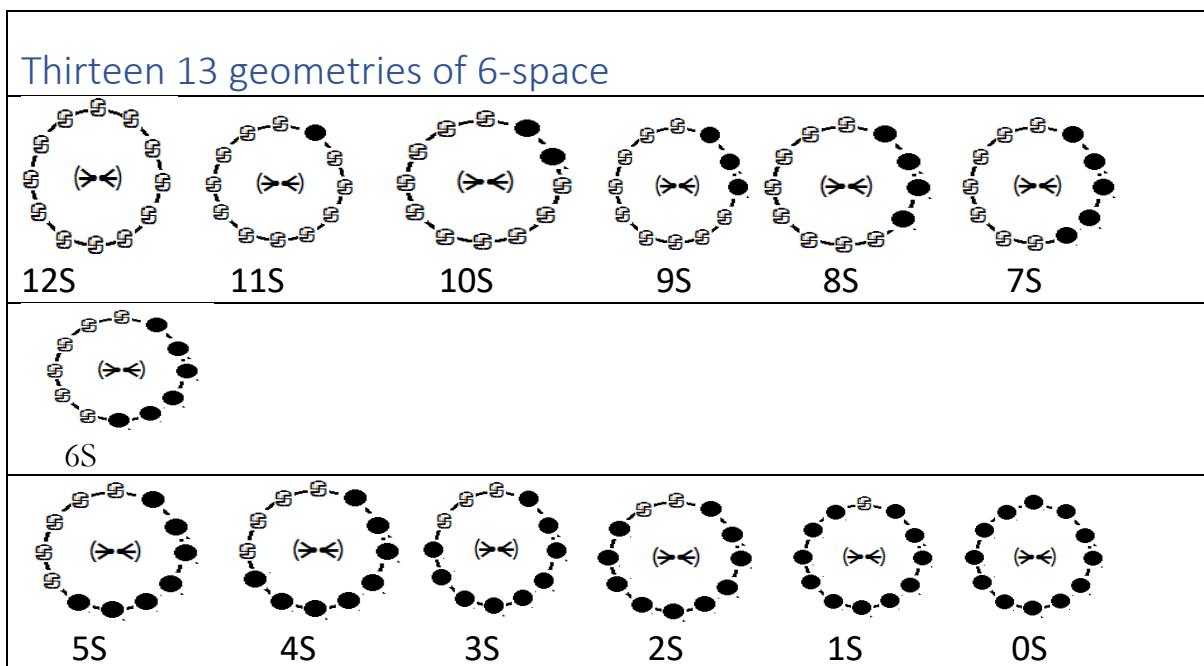

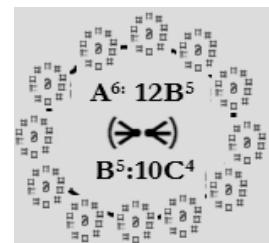

Upsutras (frequency of occurrence of 6th vowel is 10)

(U1) आनुरुच्येण ।	(1)	(U2) शिष्यते शेषसंज्ञः ।	(2)
(U3) आघमाघेनान्त्यमन्त्येन ।	(2)	(U4) केवलैः ।	(1)
(U5) वैष्टनम् ।	(1)	(U7) योजयेत् ।	(1)
(U8) अन्त्ययोर्दशकेऽपि ।	(1)	(U9) अन्त्ययोरेव ।	(1)

- ii. The frequency of occurrence of 6th vowel in the text of Sutras and Upsutras is 22 which is parallel with the summation values of four folds (3, 4, 5, 6) of hyper cube 6 in 4-space. Hyper cube 6 is of four folds (4, 5, 6, 7) of summation value 22.
- iii. Origin fold of hyper cube 6 is of Sathapatya format of 7-space, which is of transcendental order (5-space) order. Transcendental (5-space) flows from origin (7-space / pole star) of 6-space (Sun) through rays of Sun into Creator (4-space) and manifests eight directional frame parallel with solid boundary of eight components of hyper cube 4.

- iv. Eight directions formulations are of TCV values (i) East Purva 21 (ii) Agin Kon 30 (iii) North Uttar (16) (iv) Vavya Kon (34), (v) West (22) (vi) Ishan Kon (33) (vii) Dakshin South (24) (viii) Nairetya Kon (42). The summation value of these eight directions formulations TCV values is $21 + 30 + 16 + 34 + 22 + 33 + 24 + 42 = 222 = 6 \times 37 = 6 \times (18 + 19)$; 18 = H5 and 19 = h5, the Sathapatya format of 5-space origin of 4-space.
- v. Hyper cube 6 is of transcendental boundary (5-space) of 12 components. It makes 13 versions of hyper cube 6, as making Sathapatya / geometric formats of 13 geometries of 6-space.

- vi. The manifested features of Sathapatya of these 13 geometries of 6-space are parallel with attainment of 0 value state for flow of transcendental content in 13 phases, sequentially being of values as under :-

1	21	30	16	34	22	33	24	42	222
2	9	14	18	12	11	9	18	21	112
3	5	4	6	1	2	9	3	12	42
4	1	2	5	1	7	6	9	7	38
5	1	3	4	6	1	3	2	6	26
6	2	1	2	5	2	1	4	5	22
7	1	1	3	3	1	3	1	3	16
8	0	2	0	2	2	2	2	2	12
9	2	2	2	0	0	0	0	2	8
10	0	0	2	0	0	0	2	0	4
11	0	2	2	0	0	2	2	0	8
12	2	0	2	0	2	0	2	0	8
13	2	2	2	2	2	2	2	2	16
14	0	0	0	0	0	0	0	0	0
	46	63	64	66	52	70	71	102	534

4. Synthesis of six creative axes of six dimensional frame

The sequential synthetic values of 6 creative (4-space) order / axes / dimensions is

- i. Of single dimension value '4'
- ii. Of pair of dimensions value '4, 4' = 6
- iii. Of triple of dimensions value '4, 4, 4' = 6
- iv. Of quadruple of dimensions value '4, 4, 4, 4' = 4
- v. Of penta of dimensions value '4, 4, 4, 4, 4' = 0
- vi. Of hexa of dimensions value '4, 4, 4, 4, 4, 4' = - 6

5. Structural key

First letter is the structural key of mathematical domain of Vedic Ganita Sutras and Upsutras. The summation of TCV values of first letter of 16 Ganita Sutras is $64 = 2^6$.

C1 = Sutra Number, C2 = First letter, C3 = TCV value, C4 = Grand total

C1	C2	C3	C4
1	ए	6	6
2	न्	8	14
3	ऊ	6	20
4	प्	5	25

C1	C2	C3	C4
5	श्	2	27
6	आ	2	29
7	सा	3	32
8	प्	5	37

C1	C2	C3	C4
9	चू	2	39
10	य्	1	40
11	व्	7	47
12	श्	2	49

C1	C2	C3	C4
13	स	3	52
14	ए	6	58
15	ग्	3	61
16	ग्	3	64

The summation of TCV values of end (last) letters of Sutras is 123 which as dimension value takes to origin of value $126 = 6 \times 21 = 6(1+2+3+4+5+6)$, parallel with Sathapatya rod format for axis of 6-space :

C1 = Sutra Number, C2 = last letter, C3 = TCV value, C4 = Grand total

C1	C2	C3	C4
1	अ	1	1
2	:	13	14
3	म्	9	23

14	अ	1	97
15	:	13	110
16	:	13	123

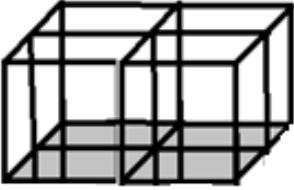

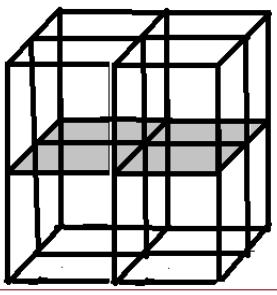

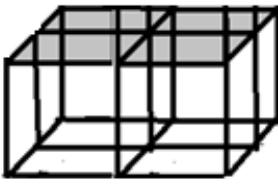

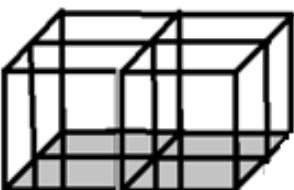

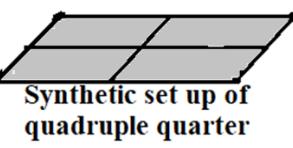

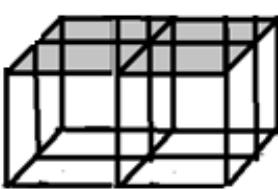

6. Sathapatya measuring rod

Sathapatya measuring rod, a synthetic set up of hyper cubes 1 to 6, representative regular bodies of full units of 1-space to 6-space of value format (1, 2, 3, 4, 5, 6) swaps 6-space domain. The summation

values of values range 1 to 6 is 21, for unit value 2 this range value becomes 42 and sequentially ahead for unit values 3, 4, 5 and 6 respectively. The values progression becomes of values 63, 84, 105 and 126. These values range is respectively of single, double, triple, quadruple, penta and hexa dimensions of Sathapatya measuring rod format.

For unit value 6, the values range (1, 2, 3, 4, 5, 6) transits into values range (6, 12, 18, 24 and 36 of grand total value $126 = 6 \times 21$, parallel with the organization format of text of Vishnu Puran being of 6 ansh and 126 chapters. The value $126 (6^2 + 6^3) / 2$; half square of value 6 + half cube of value 6.

<p>Upper Quadruple Sub cubes</p> <p>upper quadruple sub cubes</p> 	<p>Synthetic Cube of eight sub cubes</p> 	<p>Lower Quadruple Sub cubes</p> <p>lower quadruple sub cubes</p> 
<p>Upper Quadruple Sub cubes</p> <p>upper quadruple sub cubes</p> 	<p>Separation base plate</p> <p>Synthetic set up of quadruple quarter sequares</p> 	<p>Lower Quadruple Sub cubes</p> <p>lower quadruple sub cubes</p> 

This is parallel with the format of split of set up of cube as a pair of quadruple sub cubes, as upper half and lower half with separating plate of a pair of faces.

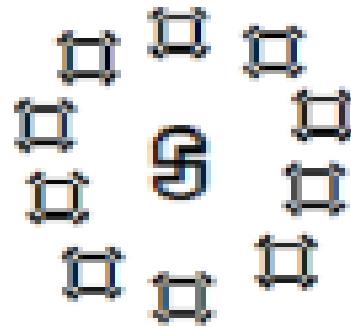

This split format into a pair of halves is the format of solar universe, as well.

First Ganita Sutra and of first letter of the first Ganita Sutras as of Sathapatya of master structural key, not only of first Ganita Sutra, but also of all the 16 Sutras and further, as well is of further 13 Ganita Upsutras.

As 6-space content split spectra is of value $6 + 4 + 4 + 2 = 16$, and hyper cube 6 the representative regular body of 6-space is of 13 versions.

The entire text of 16 Ganita Sutras and 13 Ganita Upsutras is of a composition of 519 expressed letters and 1 unexpressed letter ॐ, of 10th Upsutra (अन्त्ययोर्दशके ऽपि).

This makes expressed and unexpressed Sathapatya value being $520 = 52 \times 10 = (4 \times 13) \times 10$ of Sathapatya of Hyper cube 5 of Creative boundary of 10 components and of dimensional frame of value 15 and 15 space content split spectra being of value $15 + 13 + 13 + 11 = 52$.

7. Structural Richness of format

Sathapatya of first letter as master key, brings to focus the structural richness of the mathematical domain of Vedic mathematics Ganita Sutras and Upsutras. The expressed letter of the text are 519. Beginning with the first letter and reach upto till the last letter will blissfully fulfil our urge to be parallel with Vedic mathematics of Ganita Sutras being the basis base of Vedic knowledge systems. It is going to be a very blissful pilgrimage.

Hereunder is sequentially tabulated 519 expressed letters with TCV values and also in case of vowels, as dimensional frames permitting transcendence upto dimension of dimension level :

C1 = serial number of the letter of the text, C2 = Sutra / Upsutra number of the text, C3 = letter of the text, C4 = TCV value of the letter, C5 = is the transcendence value through the vowel (dimensional frame of respective space)

Note :- First three Sutras as of first three placements in the range of 16 Sutras

constitute a class as much as that numbers 1, 2 and 3, are not composite numbers.

The first composite numbers of the range is 4 of Sathapatya format of 4-space.

number 4 is a composition of a pair of factors and 4-space is of a spatial order.

Note :- number value 8 is of organization feature of 2^3 . Number value 8 gives rise to formulation Asht (अष्ट). The number value 8 is parallel with TCV (1), as well as is the TCV (त्रय). The organization 2^3 is parallel with split of a cube into 8 sub cubes. Further the solid boundary of hyper cube 4 is of 8 components. Hyper cube 8 is of TCV value 30 and is of TCV value (Agni con). $30 = 3 \times 10$. TCV (अष्ट) = 11; $11 \times 3 = 33 = \text{TCV (ईशान कोण)}$.

Conclusion

First glimpse of very first letter well indicates the intensity of urge and respectful patience expected from us to be parallel with Ancient Wisdom. It is a prolonged journey and simultaneously a very blissful pilgrimage.

Dr. S. K. Kapoor

November 10, 2024
