Note :-

1. Ganita Upsutra 8 text is having sixteen letters text. However it has also one unmanifest letter (अ) / first vowel. Its placement after 14th letter of the text. If this unmanifest letter is also counted for its placement, it will make the text of Ganita Upsutra-8 of 17 letters range. This way the transcendental values index of this text will increase from 39 to 40.
2. The Ganita Upsutra-2 text avails one composite letter 'ज' it is a composition of a pair of letters namely (ज), both these letters have their individual transcendental value index and accordingly both have been counted.
3. In the above 236 letters range of the whole text of Ganita Upsutras, while the composite letter has been split and both its letter being taken account for their individual values while in case of unmanifest letters of text of Ganita

Upsutra -8 the same has not been counted nor its transcendental value, as such, is index as the same is unmanifest form.

4. In case the said unmanifest letter as well would have been counted it would have made the letters range of Ganita Upsutras being 237. And the transcendental values index would have become 936.

Dr. S.K. Kapoor
