ORGANIZATION FORMAT OF GANITA SUTRAS

Step – 24: श्री: ॐ (Sri Om)

- 1. The transcendental values index of formulation Sri and Om would help us have insight about pair of these transcendental formulations and there sequential order formulations 'Sri Om'. The transcendental values index of formulation Sri is equal to 2 + 1 + 4 + 13 = 20.
- 2. The transcendental values index of formulation 'Om' being Anuswarit elongated Ukara is 10 + 3 + 3 = 16.
- 3. The grand transcendental values index of formulation 'Sri Om' comes to be 20 + 16 = 36.
- 4. One may have a pause here and permit the transcending mind to be through the following transcendental value index equation, in short (TVI) TVI (Sri Om) = 20 + 16 = 36 = TVI (ঘ্रणवः Parnava).
- 5. One may have a pause here and permit the transcending mind to comprehend and to imbibe the transcendental synthesis of formulations as per their transcendental value indices, which here in case of formulations Sri and Om as 'Sri Om' is a synthesis of pair of artifices (20, 16), which are the end values of the five fold transcendence range (20, 19, 18, 17, 16).
- 6. Here it would be relevant to note that summation value of the transcendence range (20, 19, 18, 17, 16) is 20 + 19 + 18 + 17 + 16 = 90 = NVF (artifices).
- 7. With it, the sole syllable Om (**) as dimensional order leads to the transcendental base formulation (新 Sri).
- 8. The other way around it comes to be that the transcendental base formulation (প্রা Sri) manifests sole syllable Om (🕏).

- 9. Here, it would further be relevant to note that 1-space as dimension fold shall be leading to 3-space as domain fold but as dimensional order of transcendental domain (5-space) being the transcendental base of solid domain.
- 10. Further it also would be relevant to note that 5-space as transcendental fold of the transcendence range (1, 2, 3, 4, 5) is also the origin fold of the manifestation layer (2, 3, 4, 5).
- 11.One may have a pause here and permit the transcending mind to be face to face with the phenomenon that while 1-space as dimension fold leads to 5-space as transcendental base, 2-space as dimension fold leads to 5-space as origin fold.
- 12. With it the coordination of first element 'Earth' with sky (Space) is as coordination with a transcendental base, while the coordination of second element (water), with sky (space) is as an origin fold.
- 13.It is this relationship of sky (space) with 'Earth' as well as with 'water' deserves to be comprehended well and to be imbibed fully.
