

UNDERSTANDING MATHEMATICAL BASIS OF ENGLISH LANGUAGE

Week-14 Air

Introductory

1. 'Air' is the fourth element'.
2. The placement of 'Air' in the range 'earth, water, fire, air, space) on the one hand and its placement in unity range 'earth, water, fire, air, space, sun, pole star', deserves to be chased.
3. In the unity state range, air has a middle placement.
4. $NVF(Air) = 28 = 7 \times 4$, further focuses upon the role of 'Air' as full affine unity range of value 4 at each step.
5. $NVF(Air) = 1 + 9 + 18$, takes us to sequential steps of values $(1 \times 1) = 1 \times 9^0$.
6. 1×9^1 and $2 \times 9^1 = n^1 + n^1$.
7. $NVF(Air) + NVF(Air) = NVF(Light)$.
8. $NVF(fire) = NVF(Fire\ bag)$.
9. $NVF(Bright) = NVF(Zero) = NVF(Unit) = NVF(half\ seal)$
10. $NVF(Air) = 28$ is parallel to the format and features of artifice 28 being the second perfect number
11. The organization of $28 = 1 + 2 + 4 + 7 + 14$ and $28 + 28 = 1 + 2 + 4 + 7 + 14 + 28$ deserves to be chased

*

Day 1: Air

1. $NVF(Air) = 28 = 7 \times 4$
2. $NVF(life) = 32 = 8 \times 4$
3. The life, as such is self extension feature of affine unity state of value 4 at each step
4. $NVF(air\ life) = 60 = NVF(four)$ deserves to be chased.
5. Likewise the features of 'earth air, water air, fire air, space air, sun air and pole star air' deserves to be chased
6. Air as Transcendental range (1, 2, 4, 7, 14) and as self referral range (1, 2, 4, 7, 14, 28) and as unity range (1, 2, 4, 7, 14, 28, 56) deserves to be chased. This unity range shall be leading to its second fold of values (1, 3, 7, 14, 28, 56, 112).
7. It is this feature of second fold of unity range which at next phase and stage shall be leading to third fold of values range (1, 4, 11, 25, 53, 109, 221)
8. Ahead, next fold values range would be (1 x5, 16, 41, 94, 203, 324)
9. The chase of these four folds of unity range shall be reaching our inight but air as fourth element of five elements range (earth, water, fire, air, space) which shall be attaining unity state range (earth, water, fire, air, space, sun and pole star)

*

Day 2: NVF (Air)

1. NVF (Air) = 28 and NVF (Air, air) = 56 = NVF (light) and ahead NVF (aor. Air, air) = 84 = NVF (Colour)
2. The Transcendence of fire through air into space for upward super imposition of Earth upon Sun, there is a five fold Transcendence path of 'air' of five fold sequential values.
 $28 = 2^0, 2^1, 2^2, (2^0 + 2^1, 2^2), [(2^0 + 2^1, 2^2), + (2^0 + 2^1, 2^2),]$.
3. As such chase of NVF (Air) = 28 as Transcendental range of values $2^0, 2^1, 2^2, (2^0 + 2^1, 2^2), [(2^0 + 2^1, 2^2), + (2^0 + 2^1, 2^2),]$, deserves to be followed.
4. It is by following this Transcendence path, air, fulfills domains and makes NVF (solid) = NVF (Cube) + NVF (air)
5. Further it makes NVF (cubes) = NVF (spatial)
6. Whole range of cubes together synthesizing a spatial order, it the features which deserves to be chased.
7. Cube filled with air as solid works out solid dimensional order at origin of 4-space
8. With it four space becomes porous and the solids as spatial order format five fold Transcendental path parallel to the organization of five fold Transcendence range of Summation value parallel to NVF value 28 as pair
9. One shall sit comfortably and permit the transcending mind to continuously remain in prolonged sitting of trans to glimpse this Transcendence phenomenon of fire as third element along Transcendence path of air (the fourth element), through porous 4-space and thereby there being a reach uptill Sun resulting into super imposition of Earth as dimension fold upon Sun as domain fold and thereby in the process emerging black matter of the format and features of 'pole star'.

*

Day 3: Air, Earth

1. NVF (Air, earth) = 80 = NVF (Creator) deserves to be chased.
2. Organization of $80 = 8 \times 10$ deserves to be chased parallel to 80 cube requirement for exhaustive coverage of the boundary of all the ten components of creative boundary (4-space as boundary) of Transcendental domain (5-space as boundary)
3. NVF (letter) = 80 = NVF (Creator) as such shall be bringing us face to face with format and features of 'letter' parallel to format and features of 'creator'
4. This way 26 letters alphabet becomes of values range $(80, 26) = 20 \times 80 = 20 \times 104$
5. This values range of 26 letters deserves to be chased
6. The organization $2080 = 2024 + 56$ is parallel to the organization of 2024 suktas of Rigved samhita of the organization format of 'light format'
7. Here It also would be relevant to note that TCV (वेद) = 20
8. Further as that artifice value 104 is parallel to four quarters of 26 chandas / meters

*

=====
Day 4: Air, Water
=====

1. NVF (Air, water) = 95 = NVF (Renewing) deserves to be chased.
2. It would be blissful to chase NVF (pole star) = NVF (black matter) = NVF (renewing bed)

*

=====
Day 5: Air, Fire
=====

It would be blissful to chase NVF (Air, fire) = 66 = NVF (single) = NVF (seed, seed) = NVF (Family)

*

=====
Day 6: Air, Air
=====

It would be blissful to chase NVF (Air, Air) = NVF (Light)

*

=====
Day 7: Air, Space
=====

1. It would be blissful to chase NVF (Air, space) as factors = NVF (Affine, affine) = NVF (lock, key)
2. It would be blissful to chase artifice 82 accepting pair of digits (2, 8) which permit re-organization as $(2^1, 2^3)$

*
