Section -4 Six Elements range

Introductory

1. Present section as a focus upon 'Six elements range'.
2. This focus, as such is upon
 - i. Artifice 6
 - ii. 6-space
 - iii. Hyper cube 6
 - iv. Sun
 - v. Soul
 - vi. Sun mathematics
 - vii. 'Cube, sphere', 'bag 'sun'
3. Sathapatya measuring rod / 6-space measuring rod / synthesis of hyper cubes 1 to 6 / synthesis of hyper cubes 0 to 6.
4. Further focus is to be upon 6 elements range (Earth, water, Fire, Air, Space, Sun)
5. With it the focus would be upon
 - i. Earth mathematics
 - ii. Water mathematics
 - iii. Fire mathematics
 - iv. Air mathematics
 - v. Space mathematics
 - vi. Sun mathematics
6. Further the focus, as such is to be upon 'Sun mathematics, Science and technology'.

Week-16 (Earth, Sun)

Introductory

1. NVF (Earth) = 52 and NVF (Sun) = 54, as such coordinates 'Earth, Sun' as dimension fold, domain fold.
2. Along Sathapatya measuring rod (hyper cubes 1 to hyper cube 6), 'Earth' and 'Sun' respectively shall be accepting the formats of 'hyper cube 1' and 'hyper cube 6'
3. NVF (Sun) = 54 = and parallel to artifice '54' shall be leading us to $54 = 6 \times 9$, which that way shall be taking us to manifestation layer (6, 7, 8, 9) and thereby there would be axis, origin coordination value to be $(6 \times 9) = 54$.
4. Further as that artifice 54 permits re-organization as $54 = 12 + 13 + 14 + 15$ and parallel to it are quadruple artifices (12, 13, 14, 15) which is parallel to format and features of manifestation layers (12, 13, 14, 15)
5. One may have a pause here and take note that the dimension fold $12 = 2 \times 6$, which is parallel to 12 components of Transcendental boundary (5-space as boundary of self referral domain (6-space) takes us to Transcendental origin value 15 which is parallel to the linear dimensional equivalence for 5-space

6. With it the value NVF 'Sun' = 54 unfolds as a manifestation layer (12, 13, 14, 15) which takes to Transcendental origin.
7. One may further have a pause here and take note that Sun as 6-space body is of creative dimensional order (4-space in the role of dimension) and the same unfolds as manifestation layer (12, 13, 14, 15) accepting Transcendental origin (5-space)
8. Let us further have a pause and take note that artifice 54 accept unit place digit value '4' and next place value digit '5', which is parallel to the sequential reach from creative dimensional order (4-space in the role of dimension to Transcendental dimensional order (5-space in the role of dimension).

Day 1: NVF (Earth, Sun)

1. Feature of formulation 'Sun' which deserves to be chased is its formulation availing three letters namely 'S, U and N' and the formulation of Earth availing five letters namely 'E, A, R, T, H'.
2. One may have a pause here and take note that the formulation 'Sun' avails 3 letters namely 'S, U and N' which accept NVF values triples (19, 21, 14).
3. The chase of artifices triple (19, 21, 14), shall be helping us comprehend and appreciate as that $NVF(S) = 19 = NVF(\text{egg})$
4. Further as that $NVF(U) = 21$,
5. One may have a pause here and take note that artifices pair (19, 21) are of the format and features of 'dimension fold, domain fold)
6. Further as that artifice 21 accepts re-organization as $21 = 1 + 2 + 3 + 4 + 5 + 6$ which is parallel to the format of measuring rod of 6-space.
7. Still further it also would be relevant to note that hyper cube 5 is of the format of four fold manifestation layer (3, 4, 5, 6), and 5-space as domain fold and 6-space as origin fold are sequential steps.
8. Still further it would be relevant to note that the manifestation layers (3, 4, 5, 6) as a sequential jump from the set up of 4-space as boundary fold to 6-space as origin fold.
9. Still further as that, otherwise, 4-space plays the role of dimension of 6-space as domain
10. Still further as that $6 = 4 \times 1 \frac{1}{2}$
11. One may further have a pause here and take note that artifices pair (21, 14) as well accepts coordination as $21 = 14 \times 1 \frac{1}{2}$.
12. Still further it also would be relevant to note that artifices pair (21, 14) accepts re-organization as (7x 3, 7 x 2)
13. Still further it also would be relevant to note that hyper cube 7 accepts self referral boundary (6-space as boundary) of 14 components
14. With it the transition from first letter 'S' of NVF value 19 to second letter U of NVF value 21 leads us to the coordination format of (dimension fold, domain fold)
15. Still further the transition from second letter 'U' of NVF value 21 to third letter 'N' of NVF value 14 leads us to the coordination format and features of a transition from spatial order set up (2-space in the role of dimension to solid order set up (3-space) in the role of dimension.
16. One may further have a pause here and take note that the organization of sequential triple (1, 2, 3) accepts synthesized format of pair of phases of

- transitions, firstly from artifice 1 to artifice '2' which in a way is a transition of a reach from 1 to $1 + 1 = 2 = 2 \times 1$
17. The second transition phase is of transition from artifice 2 to artifice 3 which is of the format and features of a reach from 2 to $3 = 2 \times 1 \frac{1}{2}$
 18. The chase of formulation 'Earth' as an organization of composition availing five letters of sequential range (E, A, R, T, H)
 19. The parallel artifices range comes to be (5, 1, 18, 20, 8)
 20. Earth as a formulation availing 5 letters and Sun as formulation availing 3 letters and the coordination of artifices pairs (5, 3) of domain fold, dimension fold, shall be making us face to face with the second phase of formulation of Sun namely 'un' which in simple terms means two undo
 21. One may have a pause here and take note that $NVF(S) = 19 = NVF(DO)$, which will help us appreciate that the formulation 'Sun' as 'uns', is the feature and value which is playing its role in coordination of 'Earth and Sun'
 22. Still further it also would be relevant to note that the sequential range Earth, Water, Fire, Air, Space, Sun is a six steps long range parallel to which is six steps long artifices range (1, 2, 3, 4, 5, 6) as per which artifices '1, 6' get associated respectively with 'Earth, Sun'
 23. The other way round with reversal of orientation of the artifices range shall be of sequential arrangement (6, 5, 4, 3, 2, 1), as per which artifices pair (6, 1) would get associated with formulation pair (Earth, Sun)
 24. Here it would be relevant to note that $NVF(Earth) = 52 = NVF(Six)$.
 25. As such the chase from 'Sun' to Earth, deserves to be followed for comprehension and appreciation of the Sun mathematics and its universal role of Earth to Sun range.

*

Day 2: (Sun, Earth)

1. Sun mathematics is of 'automation mode', as much as that $NVF(\text{Sun mathematics}) = 166 = NVF(\text{automation mode})$
2. Further $NVF(\text{Sun mathematics}) = NVF(\text{Center Discipline}) = (\text{interval center}) = NVF(\text{ultimate center})$
3. Still further, $NVF(\text{Sun mathematics}) = NVF(\text{Follow, follow}) = NVF(\text{Half light, half light})$
4. Here it would be relevant to note that $NVF(\text{mathematics}) = NVF(\text{cube sphere bag})$
5. One may have a pause here and take note that the cube and sphere are representative regular bodies of 3-space
6. However the domain boundary ration of cube as well as of sphere are accept same formulation $A^3 : 6B^2$ but in case of cube spatial boundary accepts six components while spatial boundary of sphere is integrated whole and its domain accepts split in six components
7. Further, in case of cube, the boundary is of the form of a geometric envelope availing 26 components (8 corner points, 12 edges and 6 surfaces) but corner points and edges are of zero area values, so the area value is contributed only by 6 surface plates as six components of the spatial boundary
8. The surface area of sphere as of value $4 \pi r^2$ and volume of sphere as of value $\frac{4}{3} \pi r^3$, well indicates the feature of volume permitting split in the process.
9. One may have a pause here and take note that 3-space is a linear order space, as much as that 1-space plays the role of dimension of 3-space.

10. One may have a pause here and take note that the set up of cube is of the format and features of four fold manifestation layers (1, 2, 3, 4) 1-space as dimension, 2-space as boundary, 3-space as domain, 4-space as origin.
11. The hyper cube format of 'cube' as a four fold manifestation layer (1, 2, 3, 4) with summation value $1 + 2 + 3 + 4 = 10 = \text{NVF (bag)}$
12. It is this manifestation feature of manifestation within spatial order creator's space (4-space) simultaneously manifesting space contents of four consecutive dimensional spaces, which that way focuses upon the content lumps
13. It is this feature focus which shall be bringing whole range of manifested bodies of 3-space content lump coming out of the same 'bag', which in the context comes to be 'cube sphere bag'.
14. One may further have a pause here and take note that $\text{NVF (Cube sphere bag)} = 112 = \text{NVF (three, three)} = \text{NVF (Domain, domain)} = \text{NVF (light, light)} = \text{NVF (folds, folds)} = \text{NVF (domain folds)} = \text{NVF (Domain light)} = \text{NVF (Three domain)} = \text{NVF (Three folds)} = \text{NVF (Mathematics)}$.
15. One may further have a pause here and take note that above format and features of mathematics leads us to $\text{NVF (linear)} = \text{NVF (solid)} = \text{NVF (Double)}$
16. One may further have a pause here and take note that a pair of orientations accepted by 1-space bodies / interval / line, in fact together synthesized a neutralized state.
17. This feature of a pair of orientations synthesizing a neutralized orientation state which as such makes 'three' folds mathematics which becomes the 'absolute' values affine mathematics' which permits parallel working at domain fold as well as dimension fold
18. It is this feature, which deserves to be comprehended well.
19. It is to be appreciated fully, same deserves to be glimpsed completely, it is the proper insight about this feature which shall be helping transit from '1' to '01' and thereby to have a reach at its reflection pair artifices '10' as '1 syllable'
20. Working with letter $\text{NVF (letter)} = 80 = \text{Creator} = \text{NVF (Line, line)}$ and working with syllable $[\text{NVF (Syllable)}] = 88 = 44 + 44 = \text{NVF (Space, Space)}$ deserves to be chased.
21. This chase will focus that here the transition is from the format of a line to that of 'space'
22. The line accepts orientation while space is free of orientations, Vedic systems transit from four fold manifestation layers to five fold Transcendence ranges.
23. The organization of the Transcendence range accept format within spatial order creator's space (4-space) as of (2, 3, 4, 5, 6) with summation value $2 + 3 + 4 + 5 = 20$
24. $\text{TCV (वेद)} = 20$
25. Here it would be relevant to note that $\text{TCV (सूर्यः)} = 26 = \text{TCV (प्रकाशः)}$
26. However $\text{NVF (Sun)} = 54$ while $\text{NVF (light)} = 56$
27. It is this distinction of format and features which deserves to be comprehended well for their full appreciation and complete imbibing.
