

# UNDERSTANDING MATHEMATICAL BASIS OF ENGLISH LANGUAGE

Week-17 (Water, Sun)

Introductory

1. Earth- Sun mathematics permits chase along two points fixation of line / interval.
2. Water – Sun mathematics permits chase along three points fixation of line / Interval
3. Sequentially a step ahead fire sun mathematics permits chase simultaneously in terms of three points fixation of a surface and four points fixation of space
4. As such the simultaneous Earth, Water-Sun mathematics chase can be along two points and three points fixations of lines within surface
5. A step ahead simultaneous chase of Earth, Water, Fire- Sun mathematics can be had in terms of two, three and four point fixation within space (3-space).
6. However Earth, Water, Fire, air – Sun mathematics can be chased in terms of two, three and four points fixation within four space.
7. Space – Sun – mathematics is of Transcendental as well as self referral features of potentialities of attaining unity state of the order, values and virtues of pole star.

=====  
Day 1: NVF (Water, Sun)  
=====

1. Water is the second element, while Sun is the sixth element.
2. The parallel placement values come to be (2, 6).
3. This pair of values (2, 6) accept value 4 at its middle and it shall be making artifices triple (2, 4, 6).
4. This artifices triple (2, 4, 6) is parallel to NVF values triples (2, 4, 6) which is parallel to format and features of ‘dimension fold, dimension of dimension fold, dimension fold, domain fold).
5. One may have a pause here and take note that this format is a format of Transcendence from dimension to dimension fold to domain fold through dimension fold.
6. One may have a pause here and take note that the Transcendental domain accepts Transcendence format of triple NVF values range (1, 3, 5), / 1-space as dimension of dimension, 3-space as dimension, 5-space as domain.
7. This triple format (1, 3 and 5) and the above triple format (2, 4, 6), are parallel as that in both cases, Transcendence format is of identical steps of reach from dimension of dimension fold to domain fold through dimension fold.
8. One may have a pause here and take note that the simultaneous availability of pair Transcendence streams (1, 3, 5) and (2, 4, 6) shall be synthesizing a self referral range (1, 2,3 4, 5, 6) and same deserves to be chased.

9. Simultaneous chase of linear order set up of transcendence format (1, 3, 5) and spatial order set up of Transcendence format (2, 4, 6), deserves to be chased.
10. One may have a pause here and take note that the availability of lines as well as surfaces within a surface is the feature which deserves to be chased to comprehend the distinctive features of spatial order over and above the linear order.

Day 2: (Water, Earth)

=====

1. One feature of the chase of (Water, earth) shall be bringing us face to face with the format and features of liquefied solids.
2. It is this feature of (Earth, Water) as 'liquefied solids' leads us to NVF (liquefied solids) = NVF (Solids volume) = NVF (Volume, volume) =  $88 + 88 = (44 + 44) + (44 + 44)$
3. Artifice 88 accepts re-organization as  $88 = 8 \times 11$ .
4. It would be relevant to note that NVF (Bed) = 11
5. Further as that NVF (Eight) = 49 = NVF (Axes) and NVF (Weight) = NVF (End eight) = NVF (Origin)

Day 3: 54, 67

=====

It would be a blissful exercise to chase artifices pair (54, 67) parallel to NVF values pair (54, 67) with illustrative formulation pair (Sun, Water) to comprehend, appreciate and to imbibe and to have insight about this pair of artifices and about illustrative pairs of formulations, in terms of the group of words compositions of NVF values 54 and 67 respectively.

Here are reproduced these groups of formulations from 'new testament'.
