

UNDERSTANDING MATHEMATICAL BASIS OF ENGLISH LANGUAGE

Week-20 (Space, Sun) Introductory

1. This week we reach final fifth phase and stage of 'Sun mathematics'.
2. The Transcendence range of phases and stages of 'Earth-Sun, Water-Sun, Fire-Sun, Air-Sun, and Space-Sun.
3. These phases and stages permit chase along the Transcendence range (2, 3, 4, 5, 6) parallel to two points fixation, three point fixation, four points fixation, five points fixation and six point fixation of line, surface, space-3, space-4, space-5 respectively.
4. Along polygons formats, this chase is going to be along the formats of interval of two units, triangle, quadrilateral, pentagon and hexagon.
5. Of these the previous phase and stage of pentagon format is unique, as much as that, every pentagon permits internal pentagon, and this inner reach continuous ad-infinitum.
6. The phase and stage ahead of the phase and stage of pentagon is of the format of hexagon.
7. However the coordination of all the inner diagonals from every vertices of hexagon shall be uniquely structuring inner hexagon which itself permits its split into six zones.
8. One may have a pause here and take note that this feature distinctively makes it a set up of sealed center hexagon (s), while the inner pentagons are of unsealed state for its center.
9. The sealed center of inner hexagon, as such shall be requiring Transcendence therefrom for reach ahead.
10. Here it would be relevant to note that $NVF(\text{space sun}) = NVF(\text{Sun space}) = 98 = NVF(\text{Transcend}) = NVF(\text{Axes, Axes})$.

Day 1: NVF (Space, Sun)

1. $NVF(\text{Space, Sun}) = 98 = NVF(\text{Transcend}) = NVF(\text{Axes, Axes})$.
2. This feature together with the sealed center feature of inner hexagon (s), leads to the self referral value, as much as that because of the internal diagonals of hexagon meeting at the center, the same bisects the sides of inner hexagon.
3. It is this feature which brings to focus the functional rule of half unit sides for the internal hexagon.
4. This as such makes Transcendence being of the format and features of 'half transcend', and the same further also becomes of the format and features of 'self referral', as much as that $NVF(\text{Transcendence}) = NVF(\text{Half Transcend}) = NVF(\text{Self referral})$
5. This feature of 'half transcend' Transcendence being 'self referral', shall be making Sun mathematics attaining self referral phase and stage of the format and features of 'Sun, Sun' with $NVF(\text{Sun, Sun}) = 108 = NVF(\text{Geometry})$, and further as that artifices pair 106, 108 leading us to the format of (pole star) as dimension fold for the (geometry domain).

6. Still further it also would be relevant to note that 'Sun' in the role of dimension shall be leading to dimensional synthesis value for 'Sun, Sun' = the value of 'light'; NVF (light) = 56

*

Day 2: (Sun, Space)

1. The reach from Sun to Space is of the format and features of NVF (Sun) = NVF (Space bag)
2. It is this feature of the Sun being 'Space bag' which deserves to be chased.
3. One shall sit comfortably and permit the transcending mind to continuously remain in prolonged sitting of trans to glimpse these feature of 'Sun' as 'Space bag'.
4. NVF (Sun) = 54, as such is of the format and features of providing Transcendence of its own from 4-space to 5-space.
5. Here it would be relevant to note that this feature shall be helping us enrich our insight as to the placement for 'element space' being as fifth element of the range 'earth, water, fire, air, space'
6. This feature would further bring us face to face with the uniqueness of the format and features of pentagon permitting inner pentagon processing and infinitum and the center remaining unsealed.
7. This would further bring us face to face with the Transcendental phenomenon of 4-space playing the role of dimension of 6-space while 5-space playing the role of origin of 4-space itself
8. The other feature of Sun mathematics, as such would be that Sun shall be having a reach to pole star as the unique set up of Earth as dimension fold getting super imposed upon Sun as the dimension fold.
9. Further it also shall be bringing us face to face the phenomenon of pole star being of the format and features of void light
10. One shall again have a pause and permit the transcending mind to continuously remain in prolonged sitting of trans and to glimpse the set up of void light as 'void cube' and as 'void domain' and further as void folds.
11. It shall be helping us comprehend, appreciate and to imbibe the format and features of void light as void cube as a space devoided of volume
12. Here it further would be relevant to note that this feature of space devoided of volume, infact would be format and features of being devoided of pairing 4-space with itself and that way it shall be devoiding volume of the restrictions of 'age' and making this as the Transcendental phenomenon of Eternity.

Day 3: (54, 44)

It would be a blissful exercise to chase artifices pair (54, 44) parallel to NVF values pair (54, 44) with illustrative formulation pair (Sun, Space) to comprehend, appreciate and to imbibe and to have insight about this pair of artifices and about illustrative pairs of formulations, in terms of the group of words compositions of NVF values 54 and 44 respectively.

Here are reproduced these groups of formulations from 'new testament'.
