

UNDERSTANDING MATHEMATICAL BASIS OF ENGLISH LANGUAGE

Week-22 (Water, Polestar)

Introductory

1. (Earth, Polestar) are of parallel format of end values of the unity range of elements (Earth, Water, Fire, Air, Space, Sun, Pole Star).
2. Parallel to above feature are the artifices pairs (52, 106) as end values of the range (52, 67, 38, 28, 44, 54, 106)
3. The seven steps long unity range of artifices (1, 2, 3, 4, 5, 6, 7) is parallel to the range of unity state measuring rod of hyper cubes 1 to 7.
4. With it artifices pair (1, 7) shall be parallel to the format and features of (hyper cube 1, hyper cube 7).
5. The artifice (17) constitute a reflection pair with artifice (71) and parallel to it are the reflection pair of formulations (Back, sphere).
6. The summation value $(17+71) = 88 = 44 + 44$ and artifices pairs (17, 71) and (71, 17) and still further the formulations pair 'back sphere' and 'sphere back' and still further paired pairs (hyper cube 1, hyper cube 7) and (hyper cube 7, hyper cube 1) as such shall be helping us comprehend, appreciate and to imbibe the values of format and features of coordination of 'Earth with pole star' and back from 'Pole star to Earth'.
7. A step ahead the coordination of 'Water' with pole star and back from pole star to Water shall be making a focus upon the artifices pairs (27, 72) and parallel to it upon the formulations pair (half, origin) along the pairing of the formats of (hyper cube 2 and hyper cube 7).
8. Here it also would be relevant to note that amongst the unity state of artifices (52, 67, 38, 28, 44, 54, 106), artifice 67 is the only artifice of format and features of odd artifice
9. Here it would be relevant to note that the split of $2n + 1$ as n and $n + 1$, or as $n + 1 + n$ or of the format and features of the organization of $2n + 1$ geometries of n space.
Here it would be relevant to note that $2n + 1$ geometries of n space permit classification as n negative geometries, n positive geometries and 1 non negative, non positive geometries.
10. These features of artifice 67 and parallel to it of NVF (67) of formulation 'Water' will further help us have insight about the format and features of element 'water'.
11. Still further it also would be relevant to note that the re-organization of 67 permits as $67 = 33 + 1 + 33$.
12. Parallel to it is the organization of a three dimensional frame splitting into a pair of three dimensional frames of half dimensions
13. In this split, the origin of original three dimensional frame shall be permitting split as a pair of half origins
14. This split of origin into a pair of half origins shall be making the pair of three dimensional frames of half dimensions being also of half origins.
15. This feature deserves to be chased.
16. This chase shall be providing us proper insight about the inherent features of the format of second element 'water', in terms of which the appreciation of

the reach from 'pole star' to the second element manifestation can be comprehended properly.

*

Day 1: NVF (Water, Polestar)

1. The water and pole coordination may be chased in many ways.
2. One way to chase this coordination of water and pole star may be in terms of their NVF values pair (67, 106).
3. It would be relevant to note that $106 = 67 + 39$, parallel to which is the NVF (pole star) = NVF (Water angel)
4. The other way to approach the coordination of pole star with second element 'Water' may be in terms of the coordination of 'hyper cube 7' with hyper cube 2.
5. Here it would be relevant to note that hyper cube 7 accepts four fold manifestation layer (5, 6, 7, 8) while hyper cube 2 accepts four fold manifestation layer (0, 1, 2, 3).
6. The fold by fold coordination shall be bringing to light the coordination along self referral ranges (i) 0-space as dimension and 5-space as dimension, parallel to which would be the self referral range
 - i. (0, 1, 2, 3, 4, 5)
 - ii. (1, 2, 3, 4, 5, 6)
 - iii. (2, 3, 4, 5, 6, 7)
 - iv. (3, 4, 5, 6, 7, 8)
7. It would be relevant to note that self referral range (0, 1, 2, 3, 4, 5) with summation value $(0+1+2+3+4+5) = 15$ shall be leading to four fold Transcendence range: (1, 2, 3, 4, 5) with summation value $(1+2+3+4+5) = 15$
8. Still further it also would be relevant to note that NVF (Transcendence) = NVF (Self referral).
9. The other way to approach coordination of (water, pole star) with NVF values pair (67, 106) with summation value $(67 + 106) = 173 = NVF$ (format Discipline) = NVF (Comprehensions).

Day 2: (Polestar, Water)

1. Reach from pole star (106) to water (67) through Sun (54), Space (44), Air (28) and Fire (38) deserves to be comprehended completely for full appreciation and proper imbibing of the features and values of this Transcendence format of black matter (106).
2. The Transcendence from pole star (106) to Sun (54) is of the format and features parallel to Earth (52).
3. One may have a pause here and take note that this that way makes it a recycling circular organization of format and features of natural range of eight steps (Earth, water, fire, air, space, sun, pole star, earth).
4. Further it creates joint at seventh step (pole star) of artifice value 106 as a synthesis of Earth (52) and Sun (54) values format.
5. One may have a pause here and take note that this, that way transforms the seven step long range (Earth, water, fire, air, space, sun, pole star) into six steps long range (Earth, water, fire, air, space, sun) as of the organization format (Sun, Earth, Water, Fire, Air, Space).

6. One may have a pause here and take note that this feature of transition and transformation of seven steps long range into six steps long range is parallel to the organization format of artifice 67 which is parallel to NVF value 67 of 'water'
7. The super imposition feature of (Earth and Sun) and resultant joint for 'pole star' deserves to be chased.
8. It is this feature of hyper line which deserves to be comprehended well and to be appreciated fully for complete imbibing of the values and for having fully enriched insight about this organization format leading to the base of mathematical basis of English language of 26 alphabet letters.
9. It would be relevant to note that NVF (Pole star) = 106 = NVF (Black Matter) = NVF (Infinity) = NVF (Axis) + NVF (Axis) = NVF (Earth) + NVF (Sun) = NVF (Creator god).
10. The superimposition of formats is the characteristics features as much as that NVF (Mathematics) = NVF (Square) + NVF (Cube) = NVF (light) + NVF (light) = NVF (three) + NVF (Three) = NVF (Domain) + NVF (Domain) = NVF (Folds) + NVF (Folds) = NVF (Index) + NVF (Index) and it shall be making NVF (linear) = NVF (double) = NVF (Solid), and still further it shall be leading us to NVF (Mind) = NVF (line) = NVF (hole) = NVF (Cup).
11. Therefore the chase of hyper line in terms of pair of consecutive hyper cubes, particularly (square and cube) and parallel to it (water) as second element and fire as third element, shall be bringing us face to face with the blissful Transcendental features of this format.
12. NVF (Water) = 67 and NVF (Fire) = 38 shall be leading us to NVF (Water, Fire) = 105
13. One may have a pause here and take note that NVF (A water fire) = NVF (pole star) = NVF (black matter).
14. Still further that NVF (Water) = NVF (black fire).
15. One may further have a pause here and take note that artifice 105 accepts re-organization as $5 \times 21 = 5 \times (1 + 2 + 3 + 4 + 5 + 6)$ which is parallel to the flow of Transcendental values (5-space) through measuring rod synthesized by hyper cubes 1 to 6.
16. It is this feature which deserves to be chased completely for full appreciation.
17. It would be further relevant to note that artifice 105 re-organization as $3 \times 35 = 3 \times 5 \times 7$.
18. The artifices range 1 to 105 permits its chase along the format of hyper cube 6.
19. There are 12 components of Transcendental boundary of 6-space.
20. As such artifices 1 to 12 shall permit their chase along the organization format of Transcendental boundary (5-space) of 12 components of self referral domain (6-space).
21. Artifices pair (13, 31) with summation value $13 + 31 = 44 = NVF (\text{Space}) = NVF (\text{Cube age})$ shall be providing us the format for the chase of the artifices range beginning with artifice 13.
22. The artifices range 13 to 43 is of 31 steps long range.
23. NVF (Solid) = 59 = NVF (cube air), shall be providing us 31 steps long range of artifices (59 to 89)
24. This pair of ranges of artifices values (31) to 43 and (59 to 89) are the manifested values ranges of solid dimensional frames of solid dimensions formats parallel to the formats of new eco sphere and eco sphere respectively. These pair of formats deserves specific chase and as such these

aspects are being taken up specifically in part -4 section -8, 9 and 10 of this course.

25. The chase of format of spheres, eco sphere and new eco sphere are subject matter of chase of sections 8, 9 and 10 of part 4 of this course.

26. The sphere format of solid dimension, as such is of five distinct folds which lead to five distinct unity states being designated as

- I. (The unity state of first solid dimension of sphere format of values range (72 to 78) can be designated as origin ambrosia unity state.
- II. The unity state of second solid dimension of sphere format of values range 43 to 49) can be designated as frame axis.
- III. The unity state of third solid dimension of sphere format of values range 14 to 20) can be designated as caged dead.
- IV. The unity state of fourth solid dimension of sphere format of values range 85 to 91) can be designated as creation mirror.
- V. The unity state of fifth solid dimension of sphere format of values range 56 to 62) can be designated as cosmic light.
