Week – 16 Transcendental carriers

Chase step 46 Transcendental carriers

1. End values of Vedic mathematics, Science & Technology systems and their processing processes manifest and availed by the Transcendental carriers.
2. Transcendental carriers carrying while transcending through manifestations.
3. Transcendental carriers carry the structural formats and features of manifestation while transcending through those manifestation.
4. Transcendence takes place through the origin folds of manifestations.

5. Transcendence through origin folds takes to the base of the origin fold.
6. One may have a pause here and take note that the transcending mind itself works as and along the formats of Transcendental carriers.
7. With it the format and features of the transcending mind run parallel to the format and features of the Transcendental carriers. The Transcendental carriers structure unity state domains (7-space as domain) of Transcendental order (5-space as order)
8. This reach of Transcendental carriers and attainment being of format and features of Structured unity state domain (7-space as domain) amounts to the reach by way of transcendence through self referral origin (6-space as origin) with unity state (7-space) as base of self referral origin
9. One may have a pause here and take note that the transcendence through self referral origin (6-space as origin), which is of creative order (4-space in the role of dimension of 6-space), so the Transcendental carriers of Transcendental order with transcendence through self referral origin, reaching at base of origin as structured unity state (7-space) becomes the ultimate attainment.
10. One may have a pause here and permit the transcending mind to be face to face with its self referral origin and to be blissfully glimpse itself as Transcendental carriers attaining unity state
11. One may further have a pause here and take note that the transcendence of Transcendental carriers of Sunlight through 6th eternal circuit of human body as top tip of the head, that way shall be unifying itself with the Transcendental carriers of the mind and thereby there would emerge Transcendental unison of the Transcendental carriers of Sunlight with the Transcendental carriers of human mind.
12. The transcendence of Transcendental carriers of Sun light through the sixth eternal circuit of human body which is of the format and features of self referral 6-space with creative order (4-space in the role of dimension) and with it the transcendence at next phase and stage shall be the transcendence through the fourth eternal circuit of human body being of the format and features of 4-space of spatial order manifesting as heart of human body
13. It is this transcendence which shall be taking to the core of the heart as seat of Transcendental origin and thereby there shall be emerge Transcendental unison
14. It is this Transcendental unison phenomenon which makes the manifestation of Transcendental format and features where by the Transcendental domains manifest creative boundary (4-space as boundary) of 5-space permitting its split as of ten creative components and as a result there happening multiplication of manifested creations of same format and features.
15. The multiplication of spatial order manifestation format, that way makes Transcendental paths of composite paths as a two fold flow process.
16. It is this features of two fold flow process of composite path of Transcendental carriers which deserves to be chased for its complete comprehension as it amounts to the composite path of two fold flow processes as a pair of perfection format and features.

17. It would be relevant to note that NVF (Transcendental carriers) = NVF (perfection) + NVF (perfection).
18. NVF (Perfection) = 111
19. One may have a pause here and take note that the feature of part being the whole applied in respect of part of the part as well and that way the tri section and the phenomenon of working with 3 as 1 and 1 as 3 and simultaneously also working with 2 as 1 and 1 as 2 parallel to the format and features of NVF (Trimonad) = NVF (monad) + NVF (monad), which further would be parallel to the format and features of dimensional synthesis values whereby synthesis of a pair of linear dimensions result into synthesis value '3' and still ahead the synthesis of triple dimension of any order always resulting into synthesis value 6
20. One may have a pause here and take note that the existence phenomenon within human frame as manifested human body accepting direct and reverse processes for the 'age duration for the existence phenomenon' deserves to be comprehended, appreciated and to be imbibed to acquire proper insight about the 'life' format and features being distinctively riding the Transcendental carriers of Sun light being birth and death features of existence phenomenon.
21. It would be blissful to chase the format and features.
22. NVF (Being) = 37 = NVF (Seal)
23. NVF (Beings) = 56 = NVF (Light)
24. NVF (Self) = 42 = NVF (New)
25. NVF (Self) = NVF (Seal- 5)
26. NVF (self) = NVF (Five) = NVF (Nine)
27. NVF (Soul) = 67 = NVF (water), the second element following Earth as the first element.

Chase step 47 Transcendence through space

1. Of different features of Transcendental carriers, prominent amongst other are of the values of Transcendence through space.
2. Sequentially space is the formulation as fifth fold of the transcendence range of five basic elements (Earth, water, fire, air, space)
3. A step ahead, at sixth fold is 'Sun'.
4. The Transcendental carriers of Sunlight transcend through space.
5. Pole star at the seven fold of the unity state make the star light Transcendental carriers being of Transcendental order which transcend through Sun as origin and manifests Sunlight for further transcendence through space as origin
6. One may have a pause here and permit the transcending mind to be face to face with this phenomenon of Transcendental carriers of starlight

transcending through Sun and manifesting as Sunlight being the composite phenomenon of super imposed lights of pair of sources

7. It is this composite phenomenon of super imposed lights of pair of sources of the format and features of origin fold and domain fold deserves to be chased for comprehending the true fold processes of the paths of Transcendental carriers
8. The Transcendental phenomenon shall be unfolding self expanding and self squeezing formats of pair of parts synthesizing and integrated whole.

Chase step 48 Transcendence through core of Sun

1. The transcendence through core of the Sun as transcendence through origin of pole star light is the unique phenomenon
2. The transcendence area manifesting as core of the Sun deserves to be chased.
3. The transcendence are being the Transcendental values zone of the Sun as such it envelops self referral pool of features as caged self referral set up
4. It is this format of core of the Sun which as a transcendence area of values zone and also being the caged self referral zone, which deserves to be chased for being face to face with the phenomenon of metaphysical life exist.
5. Meta physical life existence chase is at the core of the pursuits of the Discipline of Vedic mathematics, Science & Technology.
