

# Vedic Mathematics, Science & Technology

## FOUNDATION COURSE

Section – 4 Pure and applied values reach

### Introductory

1. Now, reach section – 4. It is about ‘pure and applied values reach’.
2. The previous three sections coverage has been about
  - (i) Installation of Shiv Lingum in creator’s space
  - (ii) Systems foundation and
  - (iii) Processes formats
3. During section – 1 chase steps, we have been through the aspect of ‘installation of Shiv Lingum in creator’s space.’
4. Essentially the reach here has been of Transcendental origin (5-space as origin) of creator’s space (4-space). 5-space as origin of 4-space has been the focus point. With it the focus remained upon the solid order (3-space in the role of dimension of Transcendental origin) and spatial order (2-space in the role of dimension of creator’s space/ 4-space).
5. The above focus had during chase steps of phase 2 of section – 1, to split of three dimensional frame into a pair of three dimensional frames of half dimensions and further the organization of the pair of hemispheres. This organization took us to three point fixation of an interval.
6. This attainment of three point fixation of an interval, the organization of a pair of hemispheres as a sphere and synthesis of a pair of three dimensional frame of half dimensions lays the foundation for systems and processes of the Discipline of Vedic mathematics, Science & Technology.
7. In this background we had reached section – 2 of the course to approach ‘systems foundation’. This approach has been of two phases as ‘along manifestation format and as along Transcendental formats.
8. Phase – 3 of the course, as first phase of section – 2 for approach to systems foundation along manifestation format had a focused upon
  - (i) Hyper cubes formats
  - (ii) Measuring rods and
  - (iii) Measuring units
9. This had attained settlement of measuring rods for dimensional domains of hyper cubes as manifestation layers. The focus has been upon the synthesis features of measuring rods being synthesized as sequential chains of hyper cubes

10. The chase steps of second phase of section – 2, namely phase – 4 of the course and a focus upon transcendence through manifestation formats of creations along the formats of creator's space (spatial order 4-space)
11. The transcendence avails five folds ranges, designated and known as Transcendental ranges.
12. The focus during this phase had been upon transcendence from origin fold to base of origin fold. It has been of format and features of 'half transcend'.
13. This format and features of transcendence being parallel to the format and features of 'half transcend', the same had led to concept
  - i. Half transcend
  - ii. Five folds ranges
  - iii. 5 x 5 matrix formats / grids formats / Panchikarn of five basic elements / five senses / 5 x 5 varga consonants and
14. NVF (Transcendental) = NVF (Caged self referral)
15. With this, that is with completion of such 1 and 2 stood completed part 1 of the course, which in a way is all about laying of 'foundation' with 'installation of Shiv Lingum' in creator's space'. In this background had taken of part – 2 of the course for reaching at 'foundation processes'.
16. Part – 2 as well has been of two sections, namely section – 3 and section – 4
17. Section – 3 has been about processes formats while section – 4 has been about pure and applied values reach
18. During section – 3 of the course the focus has been upon 'processes' formats'. This chase has been of 'two phases' namely phase – 5 and phase 6.
19. Phase – 5 of the course had a focus upon 'processes formats'. The aspects taken care of during this phase had been
  - (i) artifices chase along geometries formats
  - (ii) The space content manifestations and
  - (iii) Transcendence through manifestations
20. During phase – 6 the coverage aspects had been (i) Transcendental carriers (ii) Sunlight and (iii) Meditation
21. Now during section – 4 the attention has been upon 'pure and applied values reach'. The coverage of this section as well is of 'two phases' namely 'phase – 7 which is about pure values reach and phase – 8 which is about applied values reach.

#### Section – 4 Pure and applied values reach

#### **Chase steps phase – 7 Pure values reach (Weeks 19-21)**

#### Week – 19 Impulses

Chase step 55	Sleep state
Chase step 56	Impulses
Chase step 57	Deep sleep state

Week – 20 Self referral state

Chase step 58 Artifice 6  
Chase step 59 Hyper sphere 6  
Chase step 60 Self referral format

Week – 21 Unity state

Chase step 61 Artifice 7  
Chase step 62 Hyper sphere 7  
Chase step 63 Unity state existence format

**Chase steps phase – 8  
Applied values reach  
(Weeks 22 to 24)**

Week – 22 Solar Universe

Chase step 64 Artifice 6  
Chase step 65 Hyper sphere 6  
Chase step 66 Self referral format

Week – 23 Pole star

Chase step 67 Origin of solar universe  
Chase step 68 Pole star  
Chase step 69 Unity state existence format

Week – 24 VMS & T Foundation

Chase step 70 Sunlight  
Chase step 71 Earth to Sun range  
Chase step 72 Source reservoir origin

---

Week – 19 Impulses

Chase step 55 Sleep state  
Chase step 56 Impulses  
Chase step 57 Deep sleep state

Introductory

1. Section – 4 has the attention upon pure and applied values reach.
2. First phase namely phase – 7 of the course has attention upon pure values approach

3. NVF (Pure) = 60 = NVF (Four). This as such takes us to the pure state of origin of our Triloki (3-space) / cube whose center is the seat of 4-space as origin of 3-space.
4. NVF (Value) = 61 = NVF (Church) and NVF (Values) = 80 = NVF (Creator) .
5. This as such, takes us to NVF (Pure values reach) = NVF (Eye four creator) = NVF (Ultimate pairing).
6. TCV (शुद्ध) = 19, TCV (पवित्र) = 20, TCV (पवित्र शुद्ध) = 39 takes us to NVF (Angel) = 39
7. With it and further as NVF (Angel) = NVF (Angle) and NVF (Ambrosia) = 78 = NVF (Angel angle) = NVF (Angel, Angel) = NVF (Angle, Angle), it shall be providing angel angle for ambrosia by availing format and features of artifice 78 with artifice  $8 = 2^3$  at unit place and artifice 7 as value 70 at next place value of ten place value system.
8. These format and features together with the fact that the linear order 3-space accepts seven geometries range as its limit and beyond that comes into play a spatial order and further as  $8 = 2^3$  as transition from  $1^3$  shall be taking us from linear order 3-space to spatial order 4-space.
9. It is this shift from linear order set up to spatial order set up which shall be at the base of our reach for pure values.
10. Here it also would be relevant to note that TCV (वेद) = 20 = TCV (देव), TCV (पवित्र).
11. These features will help us appreciate that NVF (Body) = NVF (Logic) and NVF (Impulses) = NVF (A universe) and as such for values reach we have to approach 'impulses' for self referral state and also for the unity state of consciousness, more so as that NVF (impulses continuum) = NVF (Sleep state, sleep state)..

\*

---

Chase step 55      Sleep state

---

1. NVF (Sleep state) = 57 + 65 = 122 = NVF (frequencies) = NVF (Church) + NVF (Church)
2. Artifices pair 57, 75 constitutes a reflection pair and parallel to it constitutes formulations pair (sleep, series).
3. Here it also would be relevant to note that that artifices 75 is of the format and features of 5-space playing the role of dimension of 7-space which further is parallel to the Transcendental order (5-space as dimension) of unity state (7-space).
4. The artifice 57 is of the format and features of 7-space as domain going to a sleep state in its dimensional order (5-space)
5. The artifices pair (56, 65) is a reflection pair of artifices and parallel to it is the pair of formulations (center, light)
6. It would be relevant to note that NVF (Sleep state) = 57 + 65 = 122 and NVF (light series) = 141.

7. The artifices equation  $141 - 122 = 19 = \text{NVF (s)} = \text{NVF (Egg)} = \text{NVF (Do)}$
8.  $\text{NVF (Frequencies)} = \text{NVF (Church, Church)}$  and the formulation 'churches' with  $\text{NVF (Churches)} = 80 = \text{NVF (creator)}$  and  $\text{NVF (churches, churches)} = \text{NVF (Creator, creator)} = \text{NVF (purification)}$  and  $\text{TCV (शुद्ध)} = 19$  and  $\text{TCV (पवित्र)} = \text{TCV (देव)} = 20 = 19 + 1$
9. One may have a pause here and permit the transcending mind to continuously remain in deep sittings of trans and to transcend through the above format and features and to glimpse and to have blissful reach for 'pure values'
10.  $\text{NVF (impulses)} = \text{NVF (sleep, sleep)} = \text{NV F (Half renewing)}$  will further help us comprehend, appreciate and to imbibe for insight about the phenomenon of 'sleep state consciousness' as the second state of consciousness (the first being the waking state of consciousness), and as such it is the existence phenomenon of spatial dimensional order of creator's space
11. Further it also would be relevant to note that  $\text{NVF (deep sleep)} = 87 = \text{NVF (Truth)}$ .
12. Scripture preserve enlightenment as that waking state of consciousness is the first state of consciousness, sleep state of consciousness is the second state of consciousness and deep sleep state consciousness is the third state of consciousness
13. One may have a pause here and take note that the and take note that sleep state of consciousness is followed by deep sleep state consciousness
14. As such in the contest of deep sleep state consciousness, the sleep state consciousness is taken to be of the format and features of 'dream state consciousness)
15.  $\text{NVF (Dream)} = 41 = \text{NVF (Affine)}$
16.  $\text{NVF (Sleep)} = \text{NVF (Affine cage)}$ .
17. Scriptures preserve sequential range of 7 states of consciousness namely waking state, dream state, deep sleep state, cosmic state, Transcendental state, God state and Unity state of consciousness
18. Each state of consciousness has its characteristics impulses.
19. These characteristics impulses of each state of consciousness are in sleeping state of the format and features of the dimension and express and unfold as the format and features of the domain fold of the corresponding dimensional order
20. The dimension fold, domain fold pairing for sequential range of 7 states of consciousness are parallel to the format and features of artifices pairing ranges
  - i. 13, 31
  - ii. 24, 42
  - iii. 35, 53
  - iv. 46, 64
  - v. 57, 75
  - vi. 68, 86 and
  - vii. 79, 97

21. The corresponding paired formulations pairs are (i) age, cube (ii) Ear, new, (iii) eye, axis (iv) body, unit (v) Sleep, series (vi) Joint, paragraph and (viii) nature, pilgrimage

\*

---

---

Chase step 56      Impulses

---

---

1. NVF (impulses) = 114 = NVF (Sleep, sleep)
2. It would be a blissful exercise to chase format and features for the re-organizations of artifice 114 as  $1 + 113$ ,  $2 + 112$  and so on, as  $57 + 57$  and also to have a reach at corresponding paired pairs like (a universe, B mathematics, c perfection and so on sleep, sleep)
3. Still further it would be very blissful exercises to have impulses organization formats and features for the whole range of sequential states of consciousness.
4. The chase can be parallel to artifices pairs (13, 31), (24, 42), (35, 53), (46, 64), (57, 75), (68, 86) and (79, 97)
5. Here One may have a pause here and take note that the sleep state manifestations for these characteristics format and features may permit chase as (age, year, eye, body, sleep, joint and 'nature').
6. One may have a pause here and permit the transcending mind to sequentially chase these features of existence within human frame manifesting as (age, year, eye, body, sleep, joint and 'nature')
7. It would further be very blissful to have a fresh chase in terms of the corresponding formulations of Sanskrit language (आयु, कर्ण, चक्षु, काया, स्वप्न सुषप्ती, बन्ध, प्रकृति)
8. One may have a pause here and take note that the artifices pair (13, 31) is approaching triple (1, 2, 3) along both orientations with a jump over '2'.
9. Likewise artifices pair (24, 42) is having a jump over 3
10. This way we shall be reaching at 7 steps long sequential range of values (2, 3, 4, 5, 6, 7, 8).
11. One may further have a pause here and take note that this way we are sequentially transiting from unity state range (1, 2, 3, 4, 5, 6, 7) to next unity state range (2, 3, 4, 5, 6, 7, 8), like wise we can work out unity matrix format of values  $7 \times 7$ .
12. NVF (Axis) = 49 =  $7 \times 7$
13. The Vedic systems accept 49 मरुत्तगण .
14. It would be blissful to be through TCV (मरुत्तगण) =  $24 + 12 = 36 = 6 \times 6$  as 36 transcendence flow paths of  $7 \times 7$  matrix / grid format

---

---

Chase step 57      Deep sleep state

---

---

1. Conceptually deep sleep state takes us from domain to its dimension of dimension state
2. The pair of triples, 1, 3, 5 and (2, 4, 6) are of the features as that 1-space plays the role of dimension of dimension of Transcendental domain (5-space)
3. Further as that 2-space plays the role of dimension of dimension of self referral domain (6-space).
4. Here it would be relevant to note that  $5 = 2 \times 3$ .
5. Further as that  $6 = 2 \times 3$
6. Still further as that NVF (Transcendental) = NVF (transcendence area) = NVF (self referral area)
7. Still further as that NVF (Bible) = 30 = 30 coordinates (8 corner points, 12 edges, 6 surfaces, 3 dimensions and 1 origin) requiring fixation for volume of cube.
8. Still further as that NVF (volume) = NVF (space, space)
9. NVF (Volume) = NVF (A B sleep)
