MODERN MATHEMATICS

SATHAPATYA MEASURING ROD

(HYPER CUBES 1 TO 6)

Eighth Week : Day 7

Introductory

1. Structures flow is the Phenomenon which can be prominently observe in the growth of trees being Seed-Tree-Seed range for comprehension and chase of structures flow Phenomenon, the aspect of dimensional synthesis and splits is to be comprehended foremost.
2. Dimensional synthesis and split is the Phenomenon of space contents manifesting as domain folds and playing the role of dimensional folds
3. This, as such focuses upon domain fold as the role of dimension for the space content manifesting as domain fold.
4. This brings us face to face with the aspect of packed domains.
5. The packed domain is the space content manifesting as domain enveloped within geometric frame (boundary fold) and having dimensional frame with origin placement being at the center of the domain, which otherwise is the seat of origin fold.
6. The packed domain as such is the domain fold of respective hyper cube with sealed origin because of the placement of origin of the dimensional frame at the center of the domain which is the seat of origin fold itself.
7. As the origin fold is of a one degree higher dimensional order than that of the domain fold as such higher dimensional order transcends through the origin into the domain fold.
8. With this transcendence, the higher dimensional order gets super imposed upon the dimensional order of the domain fold.
9. As a result, there happens to be the split of the dimensional frame of the domain fold.
10. One may have a pause here and take note that the transcendence is a two fold Phenomenon, as transcendence

of higher dimensional order through origin into the domain fold and the flow of domain itself through origin for its reach at the base fold and playing the role of dimensional order of the base fold itself.

11. The first fold of transcendence as of higher dimensional order through origin into domain will have a reach up till and as the boundary fold.
12. The second fold of transcendence, as of domain fold through origin is of reach as dimensional order of the base fold.
13. This way parallel to the pair of folds of transcendence, there is going to be a two way flow of structures.
14. This two way flow of structures deserve to be comprehended well and to be fully appreciated for its complete imbibing to acquire deep insight and enlightenment about this Phenomenon.
15. One shall sit comfortably and permit the transcending mind to continuously remain in prolonged sitting of deep trans and to glimpse this Phenomenon.
