

**Vedic Mathematics, Science & Technology
Teacher Course**

By Dr. S. K. Kapoor

SIX DOMAIN

This day the course focus is upon 'Six domain'. It four folds aspects being taken up are as follows:

9. Six domain.
10. Number value 6.
11. Number value 28.
12. 6-space.

The values being covered are to be taught as lessons numbers 9 to 12 to the students of 6-space Vedic Mathematics, Science & Technology.

LESSON-9

SIX DOMAIN

1. Formulation six domain accepts number value format $(52 + 56)$.
2. Number value $(52 + 56) = 108$ is parallel to number value format of formulation 'geometry'.
3. Further as that, number value 108 accepts re-organization as $108 = (54 + 54)$, which is parallel to NVF of formulations pair (sun, sun).

4. One shall sit comfortably and permit the transcending mind to continuously remain in prolonged sitting of trans and to glimpse and imbibe the above formats features and values.
5. Six domain has geometric further brings us face to face with pairing (sun, sun).
6. One shall sit comfortably and permit the transcending mind to continuously remain in prolonged sitting of trans and to glimpse and imbibe the above formats features and values.
7. Let us have a pause and a fresh visit to formulations pair (sun age, sun age) = NVF (67, 67) = NVF (water, water) = NVF (number value).
8. One shall sit comfortably and permit the transcending mind to continuously remain in prolonged sitting of trans and to glimpse and imbibe the above formats features and values.
9. It would be a blissful to permit the transcending mind to continuously remain in prolonged sitting of trans and to glimpse and imbibe the values and virtues of above NVF equations.
10. It would be a blissful to take note that NVF (domain) = NVF (light).
11. It would be a blissful to take note that NVF (six) = NVF (earth).
12. One shall sit comfortably and permit the transcending mind to continuously remain in prolonged sitting of trans and to glimpse and imbibe the above formats features and values.
13. It would be a blissful to take note that NVF (sunlight) = NVF (meditation).

14. Sadhakas fulfilled with intensity of urge to know and to explore further shall make one's own dictionary of NVF values formulations.
 15. Further it would also prepare one's own dictionary of transcendental code value formulations.
 16. It would be a blissful exercise to have comparative studies of number values as NVF values and also as TCV values.
 17. These comparisons will help acquire proper insight about the parallel as well as the distinguishing feature of NVF formulations and of transcendental code value formulations.
-

LESSON-10

NUMBER VALUE 6

1. Number value 6 is the unique as it is the value of first perfect number.
 2. Further it is a unique perfect number as much as that here in this case sum its proper divisors is equal to the product of proper divisors.
 3. This feature $(1 + 2 + 3) = (1 \times 2 \times 3)$ as sum of proper divisor being equal to product of proper divisor uniquely available in respect of number value 6 only.
 4. With it, number value 6 and parallel to it 6-space acquire unique importance.
-

LESSON-11

NUMBER VALUE 28

1. Number value 28, as well as, the value of a perfect number, a second perfect number but in this case sum of its five proper divisors is equal to 28 but their product value is much bigger as much as that $(1 + 2 + 4 + 7 + 14) = 28$, while $(1 \times 2 \times 4 \times 7 \times 14) = 784$.
2. One may have a pause here and take note that values pair (6, 8) and values pair (784, 786) are of (dimension, domain) format.

LESSON-12

6-SPACE

1. 6-space as 6-space content manifesting as 6-space domain, in the role of dimension creates its space.
2. Split of 6-space domain leads to spectrum of entities (1, 2, 5 and 12).
3. One may have a pause here and take note that 6-space domain, in itself a single entity spectrum of its own.
4. Split of 6-space domain as a pair of entities of 4-space domains, also simultaneously releases a single entity of spatial order being dimension of dimension of 6-space.
5. A step ahead, there emerges is spectrum of 5 entities of 2-space domain values and in addition there emerges pair of dimension of dimension order entities of zero order.
6. As such, a step ahead, there happen to be a spectrum of 12 entities of zero space domain set up and in addition their being a release of 5 entities of (-2 space) domain as dimension of dimension values.
7. One shall sit comfortably and permit the transcending mind to continuously remain in prolonged sitting of

trans and to glimpse and imbibe the above format
feature and values.
