Ganita Sutras 5 and 6
And Ganita Upsutras 5 and 6

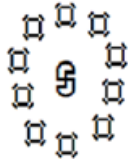

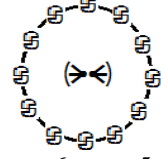

Dr. Sant Kumar Kapoor,
Ved Ratan

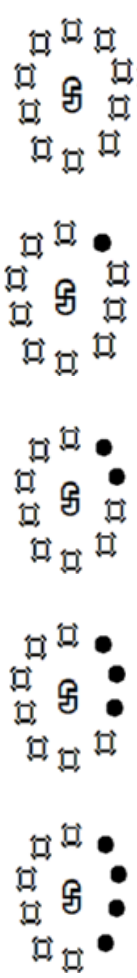

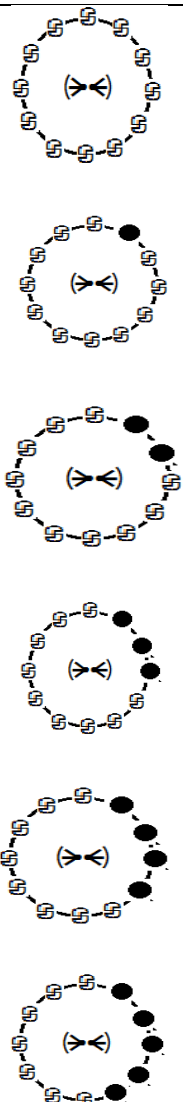

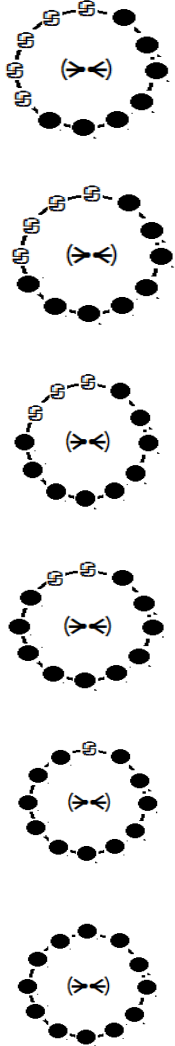

Abstract

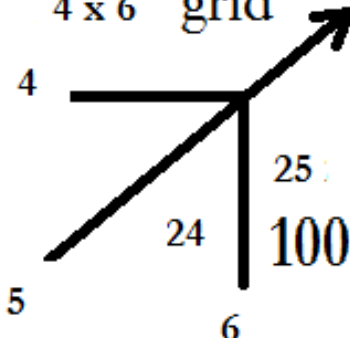

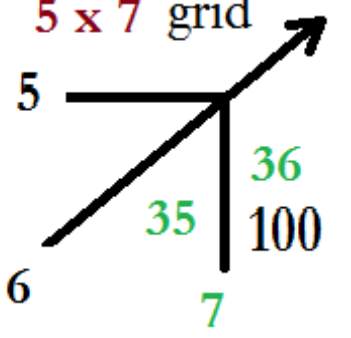

Mathematics of Ganita Sutras and Upsutras is basis base of chase of existence phenomenon of the ancient wisdom preserved as 18 Puranas.

1
Numbers pair (5, 6)

(i)	$5 = 2 + 3,$	$6 = 2 \times 3$
(ii)	5-space deity Shiv (शिव) TCV (शिव) = 12 12 = D5	6-space deity Vishnu (विष्णु) TCV (विष्णु) = 25 $25 = G_{25}^{12}$
(iii)	5-space content $D_5 = (5, 3, 3, 1) = 12$	6-space content $D_6 = (6, 4, 4, 2) = 16$
(iv)	5-space body 	6-space body 
(v)	$H_5 = (3, 4, 5, 6)$ = 18	$H_6 = (4, 5, 6, 7)$ = 22
(vi)	$h_5 = (4, 4 \frac{1}{2}, 5, 5 \frac{1}{2})$ = 19	$h_6 = (5, 5 \frac{1}{2}, 6, 6 \frac{1}{2})$ = 23
(vii)	Hyper cube 5	Hyper cube 6

	 $A^5:10B^4$	 $A^6:12B^5$
(viii)	<p>11 geometries of 5-space 11 versions of hyper cube 5 Representative bodies of geometries</p>	<p>13 geometries of 6-space 16 versions of hyper cube 6 Representative bodies of geometries</p>

					
--	--	--	--	---	--

(ix)	5-place value system 24 Double digit number 4 x 6 grid	6-place value system 35 Double digit number 5 x 7 grid
	 <p>01 02 03 04 10 11 12 13 14 20 21 22 23 24 30 31 32 33 34 40 41 42 43 44</p> <p>First triple digit number 100 of 5-place value system Is 25 of ten place value system $100 = 4 \times 5^2$</p>	 <p>01 02 03 04 05 10 11 12 13 14 15 20 21 22 23 24 25 30 31 32 33 34 35 40 41 42 43 44 45 50 51 52 53 54 55</p> <p>First triple digit number 100 of 6-place value system Is 36 of ten place value system $100 = 36 + 64 = 4 \times (3^2 + 4^2)$</p>

Text words formulations

i. Sunyam (शून्यं)

TCV (शून्यं) = 27, Sathapatya 27 = h7

structural components 27

- (i) Corner points 8
- (ii) Edges 12
- (iii) Surfaces 6
- (iv) Volume 1

ii. Sunya (शून्य),

TCV (शून्य) = 18, Sathapatya 18 = H5

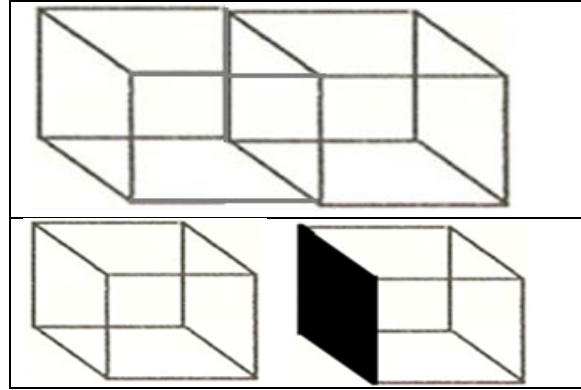

structural components 18

- (i) Corner points 4
- (ii) Edges 8
- (iii) Surfaces 5
- (iv) Volume 1

iii. Sathapatya of Sunyam (शून्यं) and Sunya (शून्य)

Synthesis of a pair of cubes has structural components 27 and 18 respectively for first cube and second cube in their synthetic set up.

5

Formulation Suneshi (शून्यैषी)

Word Sunya (शून्य) occur only once in Atharvveda Samhita (14.2.19) and it is as

Suneshi (शून्यैषी).

TCV Suneshi (शून्यैषी) = 35

Value 35 is parallel with TCV (उदगीत्) = 35 = 22 + 13 = H6 + G_{13}^6 .

Double digit number of 6 place value system are 35.

First triple number '100' of 6 place value system is of value '36' of ten place value system. Value 36 is parallel with TCV (प्रणवः) = 36. It is synonym of 'ॐ-तस्य वाचका प्रणवः'. Chandgiyounpishad in its very first mantra preserves as that ओम् इति एक अक्षर उद्गित्

‘ओमित्येतदक्षरमुद्गीथमुपासीत ।

ओमिति ह्युद्गायति तस्योपव्याख्यानम् ।’

‘One should meditate upon the syllable 'Om', the **Udgitha**;

because one sings (beginning) with 'Om'; of this now (follows) the expounding.’

TCV (ओम्) = 16, TCV (वेद) = 20, TCV (उद्गीथः) = 35, TCV (प्रणवः) = 36,

$36 = 16 + 20 = D6 + D7$, $36 = 12 + 24 = 12 \times 1 + 12 \times 2$

Numbers range 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 and numbers range

1 x 1, 1 x 2, 1 x 3, 1 x 4, 1 x 5, 1 x 6, 1 x 7, 1 x 8, 1 x 9, 1 x 10, 1 x 11, 1 x 12

Are of equal values range but are of Sathapatya of linear order format and spatial order format. These both ranges yield factor for 1 as one while for 1 x 1 as two. It is because of such transition and transformation linear order value N transit and

transforms into $N + 1$. For $N = 35 = \text{TCV}$ (उदगीथ) stands transforms as $36 = \text{TCV}$ (प्रणवः) for Sathapatya of 6-space being of 7-space origin.

6

Transition from Ganita Sutra 5 to Ganita Sutra 6

The integrated format of Ganita Sutras and Upsutras has placement for Sutras no 5 at 9th step and of Ganita Upsutra 6 at 11th step. The Ganita Upsutras 5 and 6 are of placement 10th and 12th.

W	S	L	T						
2	8	18	85						

Ganita Upsutra 5 'वेष्टनम् ।' / Oscillators; folds in case of ten place value system of 9 numerals, is for the double digit numbers as sequential progression

(09, 18, 27, 36, 45, 54, 63, 72, 81, 90)

The first digits row is of (9, 8, 7, 6, 5, 4, 3, 2, 1, 0) while the second digits row is of (0, 1, 2, 3, 4, 5, 6, 7, 8, 0). These ascending (Aolom आलोम क्रम) and decending orders (Vilom विलोम क्रम) as integrated format makes a synthetic row of 20 steps :

(0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 9, 8, 7, 6, 5, 4, 3, 2, 1, 0)

Parallely there will be transition and transformation for '10' place value system into '20' place value system. The value '20' is parallel with TCV (वेद). The difference value $20 - 10 = 10$, as such, decreases number value $N \geq 20$ by '10'. Illustratively the number value '25' of '10' place value system will be '25 - 10' = 15. The value '22' of '10' place value system will be '22 - 10' = 12. In case of

values pair '12 and 22' of ten place value system, are of Sathapatya D5 and H6. H6 is representative regular body of 6-space of deity Vishnu while TCV (शिव) = 12, a 5-space deity. Like that the transcendence and transition from a given space to another space has a parallel transcendence and transition for the corresponding place value systems. It is this format of Vedic mathematics which is at the basis base of chase of existence phenomenon in 18 Puranas.

7

Shiv Shastranam Stotram of Lord Vishnu

Lord Shiv is overlord of 5-space. Lord Vishnu is overlord of 6-space. 5-space has 6-space as origin. Shiv Shastranam Stotram is a scripture of one thousand word formulations of features, values, Sathapatya mathematical formulations of 5-space domain manifestation of 5-space content in 4-space (creative dimensional order of 6-space). Shiv Shastranam Stotram is a scripture of 132 Shalokas. Value 132 is of organization 11 x 12, parallel with the Sathapatya of 11 geometries of 5-space and 12 transcendental boundary components of 6-space. The organization of 1000 transcendental names of 5-space is of 131 Shalokas. The triple digit number 131 is of Sathapatya of triple digits 1 x 1, (1, 1), 1 x 1. Hereunder are being tabulated, frequencies fold wise organization of TCV values of 1000, transcendental names of Lord Shiv.

9

Creator space

Spatial order 4-space is creator space.

Second element is 'आप Aapa / water'.

TCV 'आप Aapa / water' = 8.

TCV value 8 (अष्ट / Asht / eight) = 11 = एकादश Ekadash / eleven.

TCV (जल Jal / Water) = 11.

TCV (एकादश Ekadash / eleven) = 19 (एकनोविंशति / nineteen).

(19, 18, 17, 16, 15, 14) is transcendental range of dimensional order 14.

Value 14 is summation value of four folds (2, 3, 4, 5) of hyper cube 4, representative regular body of 4-space of spatial order.

TCV (एकनोविंशति / nineteen) = 50 / fifty.

Summation of digits of / 50 is 5 + 0 = 5.

$$50 = 1 \times 50$$

$$100 = 2 \times 50$$

$$\text{Summation of digits of '100'} = 1 + 0 + 0 = 1$$

Fifth fold of frequencies of TCV values of 1000 transcendental names of Shiv Shastranam Stotram is

Table 5

Table of fifth fold of frequencies

C1 = Serial number, C2 = fourth fold frequency, C3 = frequency of fourth fold frequency

1	1	1
2	5	1

Existence phenomenon chase

Ancient wisdom has a chase of existence phenomenon from its zero state and dissolution back in the zero state. TCV (शून्य Sunya / Zero) = 18 = TCV (सृष्टि

Srishti / Creation) = H5, representative regular body of 5-space, in its zero state in creator (4-space). Formulation (शून्य / Sunya / zero) attains its cyclic order after eighth cycle, the fifteen phases cycles :-

First 8 cycles are of summation value $104 = 26 \times 4$ and followed by 15 cyclic phases of value $40 = 10 \times 4$. Value 26 is the summation value of four folds of H7 while value 10 is the summation value of four folds of H3. Grand value $104 + 40 = 144 = 12^2$ of $8 + 15 = 23$ of cyclic range of formulation Sunya is parallel with TCV (जन्म) Janam / birth).
